SIGN MANUFACTURING

Statewide can help you determine the right signs and installation specifications for your project. Our extensive knowledge of current MUTCD and Caltrans specifications ensures that your sign installations will be in compliance with state and local regulations. Our products include MUTCD Compliant traffic control signs, street signs, custom signs, work zone signs, commercial and industrial signs, logos, decals, sign hardware and materials.

TRAFFIC CONTROL SERVICES & PERMANENT INSTALLATIONS

Traffic Plans & Permitting Assistance

Our traffic control experts can help you in every phase of the planning and permitting process. We can survey the location and design the appropriate Traffic Control Plan for your work zone or event that conforms to the State and Federal Manual of Traffic Control Devices (MUTCD). We can promptly produce traffic planning for your project or special event whether a short term lane closure or a long term multi-phase project.

Our experienced engineering departments work closely with local municipalities, Caltrans and State DOTs to assist in the permitting process and ensure compliance on your project. We can help you in obtaining street use and encroachment permits as well as assisting in securing the required insurance documentation.

Lane Closures & Flagging Services

Our well-trained, dedicated professional staff has extensive experience in single-lane closures, multi-lane closures, two-direction lane closures and moving work zone traffic staging.

We will set up, maintain, move and remove devices and equipment as required for your project, 24/7. Our modern fleet of equipment and devices will provide an added level of visibility to your work zone.

We can handle any size job from a residential street to major Interstate Highways. Our professional Flaggers are trained and certified by the American Traffic Safety Services Association (ATSSA).

With multiple locations throughout the west and our extensive resources, we can supply all of your traffic control needs when and where you need them, so you can focus on your projects.

Detours, Freeway & Road Closures

Our well-trained expert crews have extensive experience in setting up detours, road closures and major freeway closures. With the largest fleet of traffic control equipment in the west, Statewide can provide resources to support even the largest projects. We can provide advance notification over a wide area with our large inventory of construction signs and electronic Message Boards.

We will provide proper placement, maintenance and removal of all traffic control devices required to protect the work zone on your project. Our Project Managers work closely with your company to coordinate timely staging of traffic and movement of traffic control devices. Whether your job is a quick turnaround or a long term project, Statewide has the resources you need, when you need them.

Roadside, Street & Overhead Sign Installations

The experts at Statewide can help you determine the right signs and installation specifications for your project. Our extensive knowledge of current MUTCD, Caltrans and State DOT specifications ensures that your sign installations will be in compliance with state and local regulations.

Crash Cushion & Attenuator Installations

The experts at Statewide can help you determine the crash cushions and installation specifications for your project. Our extensive knowledge of current MUTCD, Caltrans and State DOTs specifications ensures that your crash cushions installations will be in compliance with state and local regulations.

Traffic Channelizer & Delineator Installations

The experts at Statewide can help you determine the right channelizers and roadside delineators for your project. Our extensive knowledge of traffic control devices and traffic planning ensures compliance with state and local regulations.

Temporary Installation Services

The experts at Statewide can help you determine the right signs, equipment and supplies for your project. Our extensive knowledge of traffic control signs and traffic planning ensures that your jobsite or event will be in compliance with state and local regulations.

Our multiple locations throughout the west enable us to provide temporary installations when and where you need them. With our extensive resources, we can handle any size project, 24/7, short term or long term.

We can deliver, install, maintain on-site and remove as needed, on your schedule so you can focus on your project.

Equipment Repairs

Our well-trained expert mechanics have extensive experience in repairing traffic control equipment, line strippers and more. Our skilled technicians can repair and replace damaged components on most types of equipment.

We can service your equipment in-house or on-site so you can keep your job going. With our extensive resources, we can handle all of your equipment and traffic control device repairs so you can focus on your projects.

IMPACT ATTENUATORS

Tau-II™ Impact Attenuator Parallel Systems

The Universal TAU-II crash cushion System consists of a full line of redirective non-gating crash cushion products that have been tested to meet the rigorous requirements of NCHRP Report 350, Test Levels 2 and 3. The system is provided in lengths and capacities for both low and high speed applications (30-75 mph, 50-120 km/h). The Parallel system can protect hazards with widths up to 36" and the Wide Flange system can protect hazards with widths up to 102".

The Universal TAU-II Impact Attenuator is fully redirective and is ideally suited for roadway hazards such as the ends of rigid barriers, toll booths, utility poles and more. Ease of installation, numerous transition options, low maintenance requirements, and reusability of system components make the TAU-II system ideal for protecting most roadside hazards.

TAU-II-R™ Reusable Crash Cushions

The Redirective, Non-Gating, Reusable (R-NG-R) Universal TAU-II-R Crash Cushion is designed to meet NCHRP Report 350 as a reusable attenuator to protect motorists at speeds up to 110 km/h (70 mph) from hazards that range from 700mm - 2.4m (27" - 96"). The Universal TAU-II-R System uses Hyperelastic Polyurethane Modules tested to withstand multiple design head-on impacts before requiring replacement. The Universal TAU-II-R System is part of the Universal TAU-II Family so maximum interchangeability between all Systems helps keep inventory costs low. In addition, existing Universal TAU-II Systems can be upgraded to Reusable TAU-II-R Systems by replacing existing cartridges and nose with Universal TAU-II-R Modules and Reusable Nose.

FEATURES:

- Hyperelastic (HE) Modules designed to withstand multiple design capacity head-on impacts
- Can convert existing Universal TAU-II Partially Reusable Systems to TAU II-R Reusable Systems by simply installing Universal TAU-II-R Modules and TAU II-R Nose
- Utilizes same universal parts that are used with Universal TAU-II Systems to reduce inventory costs
- Minimum number of anchors
- Uses standard transitions

WHERE TO USE:

To shield concrete barrier in medians, side of road or gore areas in asphalt or on concrete roads where impacts may be frequent or in areas hard to reach by maintenance crews. Can be installed as a permanent or temporary attenuator.

UNIVERSAL TAU-II-R SYSTEM SPECIFICATIONS:

- Classification - Redirective, Non-Gating, Reusable (R-NG-R) Impact Attenuator
- TL-3 Length - 7.3 m / 23' 10"
- Width - 0.7 - 3 m / 27 - 102"
- Height - 800 mm / 31 1/2"
- Test Level - NCHRP 350 TL 1 / 2 / 3

**RENTALS
AVAILABLE**

ArmorGuard™ Longitudinal Steel Barrier

The ArmorGuard Steel Barrier is a heavily reinforced NCHRP 350 TL-3 longitudinal barrier designed for emergency openings, contraflow applications and work zone access. Used in center permanent and temporary medians to create a gate between concrete barrier or guardrail. Can also be used on a side of road or as a transition to a different concrete barrier profile. The steel barrier system can be safely opened or closed in under 2 minutes using only manual power. Optional pneumatic jacks can be added to make opening even faster. The System is easy to maneuver on steeper gradients with the use of a built-in navigation and braking till. The ArmorGuard Steel Barrier has been performance tested on all road surface types including gravel. The ArmorGuard Steel Barrier is available in 8, 12 or 16 m (26', 39' or 52') sections.

- 160 mm (6") Permanent Deflection, 8 m (26') System tested
- Can be deployed on gradients up to 8%
- Robust transition design
- Easily installed on bridge decks and viaducts
- Available as a 8, 12 or 16 m (26, 39 or 52') System
- Easily opens without electricity
- Performance tested to open and close in under 2 minutes.
- Pneumatic option available
- Ideally suited for rerouting traffic and for emergency access

RAPTOR™ Crash Cushion for Poles and Trees

The RAPTOR System is designed to reduce the severity of errant vehicle impacts with a utility pole or tree. The RAPTOR System uses weather resistant energy absorbing material surrounded by a UV stabilized polyethylene shell to shield poles and trees located on the roadside. It can be installed at many sites that do not have the space needed for a traditional impact attenuator and does not require a foundation. The RAPTOR 300 & 600 Systems meet NCHRP 350 TL-1 criteria as non-redirective impact attenuators.

FEATURES:

- Easily expandable to fit multiple width hazards
- Meets NCHRP 350 TL-1 test criteria
- Reduces the severity of vehicle impacts into trees or utility poles
- Little to no debris scatter
- 300 mm (12") & 600 mm (24") sizes available based on hazard diameter
- Easily installed
- Fully recyclable

RAPTOR 300 SPECIFICATIONS:

- Length - 246 cm / 97"
- Width -115 cm / 45"
- Height - 105 cm / 41"
- Hazard Size - 30 x 59 cm / 12 x 23"
- Test Level - NCHRP 350 TL-1

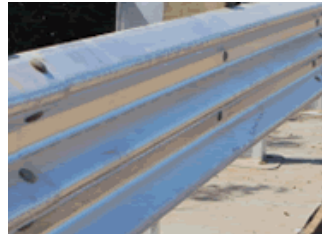

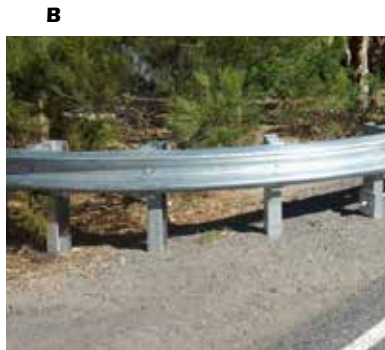

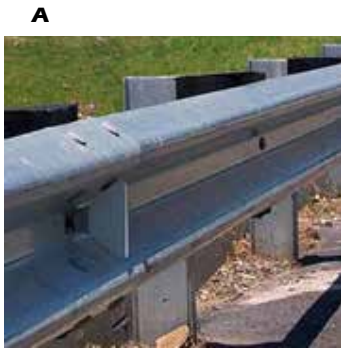

RAPTOR 600 SPECIFICATIONS:

- Length -276 cm / 109"
- Width -115 cm / 45"
- Height -105 cm / 41"
- Hazard Size - 60 x 59 cm / 24 x 23"
- Test Level - NCHRP 350 TL-1

I..... T07855...975G.....		Thrie Beam Terminal End, 10 gauge

J - Steel Guardrail Post

Galvanized Steel I-Beam Guardrail Post 6" X 8.5" X 6', meets material specification ASTM A36. Steel posts are drivable into most soils and can be substituted for wood posts. All posts are NCHRP Report 350 Test Level 2 and Test Level 3 compliant.

KEY SKU	MFG#	DESCRIPTION
J..... T07816...14871G.....		I-Beam Guardrail Post, 6" X 8.5" X 6', NCHRP-350 Test Level 3

K, L - King Block™ Composite Offset Block

The King Block™ is used for guardrail panel installations using steel posts. The King Block is a composite, polyethylene/ crumb rubber block made fully from recycled materials. It can be substituted for wood offset blocks on steel posts. Once installed, these blocks maintain original size, vastly reducing the need for tightening guardrail bolts due to shrinkage often found with wood blocks. Features Self-hanging fingers, Self-aligning side rails, Bottom tab supports rail during installation. Block is considered a "green" product, environmentally safe and recyclable. NCHRP Report 350 Test Level 3 compliant.

KEY SKU	MFG#	DESCRIPTION
K..... T07840...6777B.....		King Block™ Composite Offset Block, for W-Beam, 4" X 7.5" X 14"
M..... T07835...6X8X6DF2HOLE.....		DF Wood Guardrail Post, 6" X 8" X 6' Two Hole

E, F - FG 527 Guardrail Reflector Post

The FG 527 marker is a bright high profile marker measuring 27" in length that has 36 square inches of High Intensity Prismatic (HIP) reflective sheeting. The 527 markers are effective at critical points along the roadway where vision can be partially restricted by hills, curves or vegetation. The markers can be mounted on wooden guardrail posts positioning the reflectors 48" above the roadway surface.

A-D - FG 300 Surface Mount Channelizer Posts

The clover-leaf design of the FG 300 tubular marker provides far better rebound than simple round tubes. The curving of the sides of the FG 300 tube changes the moment of inertia and builds up tremendous potential energy, resulting in a quick and sharp rebound after impact.

The FG 300 is offered in three grades: Model PE (15 vehicle impacts at 60 MPH) for general applications, Model UR (50 vehicle impact at 60 MPH) the industry workhorse, and Model EFX (60 vehicle impacts at 60 MPH) for your toughest installations. All three models are compatible with all six of our bases. FG 300 posts meet or exceed state specifications for surface mounted delineator posts, have been proven on the NCTEP Test Deck, and are compliant with NCHRP 350. No metal pins in bases to rust or seize – simple installation and replacement of damaged posts.

- Superior impact resistance for lower maintenance
- Conforms to MUTCD & NCHRP 350 standards
- Replacement of damaged posts in just seconds
- Withstands extreme hot & cold temperatures
- True fluorescent colors for increased visibility
- Proven durability on the NCTEP Test Deck
- Greater reflectivity than simple round tubes
- No metal pins in bases to rust & seize
- Available in many heights & colors
- Easy installation on any roadway
- Bases can be reused

A Family of FG 300 Bases - Davidson offers six different bases for our FG 300 posts to meet your needs for both permanent and temporary applications:

- FG 300 Lite Black Base – our standard base for general purpose installations
- FG 300 Heavy Duty Colored Bases – extra delineation and extra toughness
- FG 300 Invisi-Base – for installations flush with the pavement
- 10# Portable Rubber Base – for temporary use e.g. school crosswalks
- 40# Portable Rubber Base – for demanding work zone installations
- FG 300 Metro Base - Slimmed down version for parking garages, tunnels and barrier wall delineation

E - FG 500 Roadside Delineator Posts

These drivable flexible guide posts for roadside delineation are made of recycled engineering polymers to withstand repeated impacts. They will not discolor when exposed to UV rays and will not rust, rot or splinter. They offer strength, flexibility and durability to stand up in the harshest weather conditions. FG 500 posts can be cut to any length and the single curve profile of the post provides maximum impact resistance and durability.

F - Super Bundy Adhesive Pad

Provides permanent installation of surface mount delineator posts and other traffic control objects that are subject to high impact. Requires (2) pads per installation. Provides exceptional bond to asphalt, concrete and brick. Easy application by heating with torch with no temperature restrictions. Pavement must be dry. Super Bundy is a two-piece system. Do not attempt to use a single piece only as this will result in inadequate bonding and potential failure.

KEY SKU	MFG#	DESCRIPTION
F.....M03226	..8430568" x 8" Super Bundy Torch Down Adhesive Pad-Gray
F.....M03270	..40138" x 8" Super Bundy Torch Down Adhesive Pad-Black

G - General Sealants Butyl Pads

Ultra high surface bond used in construction applications. Immediate seal. Very good elongation, high recovery and excellent flexibility. Excellent for expansion, contraction, vibration and joint movement.

Subject to availability. Statewide Traffic Safety & Signs is not responsible for errors or omissions. Pictures may not represent advertised item.

A - Solar Powered Radar Speed Signs

LED display with directional beam technology delivers a superior quality display for drivers, even in bright sunlight. Radarsign's proprietary design serves as a cone, magnifying the intensity of the light, and pinpoints it directly to the view of approaching drivers. NEMA 4R level compliant; meets or exceeds MUTCD design guidelines; Makrolon® polycarbonate cover provides maximum UV protection and is abrasion, shatter, and graffiti resistant.

Model TC-600S

- Solar Powered, side pole mount with 45° angle bracket for effective solar charging, Solar Panel Output: 40 watt
- 28"W x 33"H YOUR SPEED faceplate with 4" high lettering
- Ideal for 10-45 mph speed limit roads, detects vehicles up to 1200 feet away
- Slow flash of actual speed; Fast flash of actual speed; SLOW DOWN message; TOO FAST message; Simulated camera flash (optional)
- Display speed and custom message alert message alternately
- Wi-Fi Enabled - Allows access to program signs from most web enabled devices, Password protection, Range of up to 300 feet from sign

Model TC-1000S

- Solar Powered, side pole mount with 45° angle bracket for effective solar charging, Solar Panel Output: 65 watt
- 36"W x 44"H YOUR SPEED faceplate with 6" high lettering
- Ideal for 40-75 mph speed limit roads, detects vehicles up to 1200 feet away
- 2 speeds of flashing LEDs to notify drivers that are exceeding the speed limit, SLOW DOWN alert message
- Bluetooth® Wireless - Allows secure wireless operation of radar speed sign and data collection directly to a Windows laptop from the comfort of a nearby vehicle. Optional Android app for use with many Android tablets and smartphones

B - BriteSide® Reflective Panels

When safety is an issue – particularly in high incidence areas – the need for highly visible signs is a necessity. With BriteSide Reflective Panels, visibility is increased dramatically, day or night, rain or shine, making the roads safer for motorists and pedestrians. Satisfies MUTCD requirements.

FEATURES: Higher day/night visibility, Vertical reflectivity leads eye to sign, Theft-resistant fasteners, Mounts in seconds, No sharp edges, Non-corrosive, Available in 2 grades of 3M™ Reflective Sheeting

KEY SKU	MFG#	DESCRIPTION
B S09583	BSD-472-HI-RED	4" W x 72" L extruded PVC w/ red Prismatic High Intensity sheeting for square (1.75" or 2") and round (up to 2.3" o.d.) posts. Includes 3 mounting brackets and 6 tamper resistant square head screws.
B S09584	BSD-472-DG-FYG	4" W x 72" L extruded PVC w/ flo. yellow green Diamond Grade sheeting for square (1.75" or 2") and round (up to 2.3" o.d.) posts. Includes 3 mounting brackets and 6 tamper resistant square head screws.
B S09585	BSF-1.7572-HI-RED	1.75" W x 72" L w/ red Prismatic High Intensity sheeting for wood posts or 2" square post. Includes 6 tamper resistant 1" square head screws.

C - Stop/Stop BlinkerPaddle® Flashing LED Paddles

Flashing LED paddles deliver a bright warning to help protect children, crossing guards, temporary traffic control personnel and road/emergency personnel. Eight bright LEDs on each face flash in unison, commanding the attention of oncoming motorists in all weather conditions. Thumb switch turns LEDs on for either (or both) sign faces. LEDs automatically shutoff when paddle lowered below horizontal. Light-weight design minimizes arm and wrist stress (18" paddle weighs less than 2 pounds). Includes: (1) BlinkerPaddle LED Paddle, (3) rechargeable NiMH batteries, (1) 120v AC wall charger.

KEY SKU	MFG#	DESCRIPTION
C T25051	2180-00301	18" STOP/STOP BlinkerPaddle, hi-intensity grade sheeting
C T25052	2180-00302	18" STOP/STOP BlinkerPaddle, diamond grade sheeting

D - Stop/Stop Paddle, Non-Reflective

Lightweight double sided STOP/STOP paddles are ideal for controlling traffic in construction work sites, school crosswalks, parking lots, any other area where traffic and pedestrian are in close proximity.

KEY SKU	MFG#	DESCRIPTION
D T08023	PAD ST/ST	18" STOP/STOP plastic paddle w/ 6" PVC handle, non-reflective

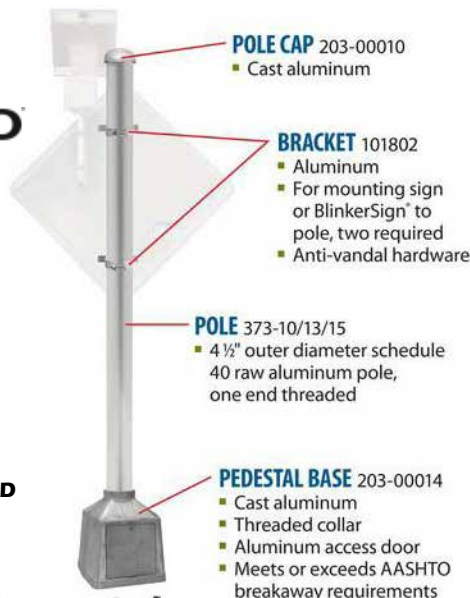

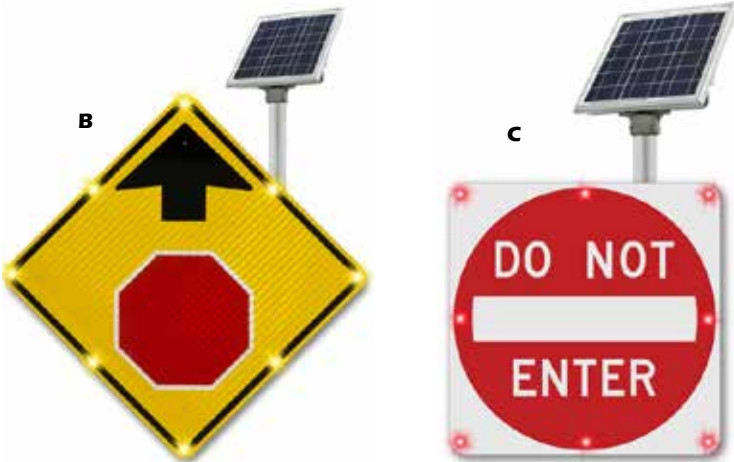

E - Portable Cross Walk Sign

Portable Cross Walk Sign, STATE LAW YIELD TO PEDESTRIANS, Both Sides

KEY SKU	MFG#	DESCRIPTION
E T02509	8FG342FYGEFX34	Portable Cross Walk Sign, 2-sided

3 YEAR WARRANTY

ANCHOR BOLTS

- Galvanized steel
- 3/4" x 18" 122-UA242 (for frost free areas) included. 1" x 42" 3177-42 (for areas with frost/snow cover) sold separately.

A - BlinkerSign® Flashing LED STOP Sign R1-1

TAPCO's BlinkerSign® Signs combine flashing LEDs and 3M DG³ reflective sheeting, resulting in the most visible signage available. Powered by an eco-friendly solar panel, BlinkerSign® LED signs deliver the message day and night alike. Ideal for high-incident areas or where new traffic conditions exist. The TAPCO patented AutoBright circuitry measures the available light and adjusts the LED flash brightness accordingly. Every BlinkerSign® is backed by a three year warranty (extended warranty available). Installs easily onto any new or existing sign post.

- Can be integrated into an ITS (Intelligent Transportation System)
- Optional programming available: around-the-clock operation, off time clocks, push buttons and/or vehicle motion detectors
- Multiple signs can be synchronized
- Heightens driver awareness
- Anti-graffiti film overlay
- Easy installation
- Proprietary AutoBright™ circuitry
- Fully encapsulated wiring protects against inclement weather, tampering and vandalism
- Day-Viz® daylight visible high intensity LEDs are visible in bright daylight, fog, rain and snow
- No AC is required. The low power allows for a smaller panel and a cleaner look

KEY SKU	MFG#	DESCRIPTION
A T25017	...2180-00209BlinkerSign® Flashing LED STOP Sign R1-1, 30" x 30", aluminum
A T25018	...2180-00208BlinkerSign® Flashing LED STOP Sign R1-1, 36" x 36", aluminum
A T25019	...2180-00207BlinkerSign® Flashing LED STOP Sign R1-1, 48" x 48", aluminum

B - BlinkerSign® Flashing LED Stop Ahead (Symbol) Sign W3-1

W3-1, 30" DG3 FY, Stop Sign Ahead (Symbol) Solar Powered BlinkerSign with 8 yellow LEDs.

- Installs easily onto any new or existing sign post
- Can be integrated into an ITS (Intelligent Transportation System)
- High intensity Day-Viz™ LEDs command attention day and night
- Can be programmed to operate continuously (24/7) or on solar time clocks, push-buttons and motion (vehicle) detectors
- Proprietary circuitry automatically adjusts light output for maximum visibility and battery efficiency
- Multiple signs can be synchronized
- Heightened driver awareness
- Increased visibility at high incident intersections

C - BlinkerSign® Flashing LED DO NOT ENTER Sign R5-1

Standard 24/7 flashing BlinkerSign with high visibility LEDs and Diamond Graded Cubed reflective sheeting, 13W solar panel, 6VDC battery charger, installation tool, installation instructions and user guide. Pole and pole mounting brackets sold separately. Blinkersign, R5-1, 30", Do Not Enter, DG3, Red/White, Solar, 8 Red LEDs.

KEY SKU	MFG#	DESCRIPTION
C T25070	...2180-C00067BlinkerSign® Flashing LED DO NOT ENTER Sign R5-1, 30" x 30", aluminum

D - Heavy Duty Pole Packages

Pole Kit Includes:

Pole Cap - cast aluminum

Sign Mounting Brackets - aluminum, anti-vandal hardware

Pole - 4.5" outer diameter, 40 raw aluminum, one end threaded

Pedestal Base - cast aluminum, threaded collar, aluminum access door, meets AASHTO breakaway requirements

Anchor Bolts - galvanized steel, 3/4" x 18"

KEY SKU	MFG#	DESCRIPTION
D T25067	...10191913' X 4.5" OD Pole Kit
D T25085	...10192015' X 4.5" OD Pole Kit

A - BlinkerSign® Flashing LED Pedestrian Crossing (Symbol) Sign W11-2

TAPCO's BlinkerSign® Signs combine flashing LEDs and 3M DG³ reflective sheeting, resulting in the most visible signage available. Powered by an eco-friendly solar panel, BlinkerSign® LED signs deliver their message day and night. Ideal for high-incident areas or where new traffic conditions exist. The TAPCO patented AutoBright circuitry measures the available light and adjusts the LED flash brightness accordingly. Every BlinkerSign® is backed by a one year warranty (extended warranty available). Installs easily into new or existing signpost.

- Can be integrated into an ITS (Intelligent Transportation System)
- Optional programming available: around-the-clock operation, off time clocks, push buttons and/or vehicle motion detectors
- Multiple signs can be synchronized
- Heightens driver awareness
- Anti-graffiti film overlay
- Proprietary AutoBright™ circuitry

KEY SKU	MFG#	DESCRIPTION

A..... T25003	...2180-00232BlinkerStop® Flashing LED Pedestrian Crossing (Symbol) Sign W11-2, 36" x 36", aluminum

B - RRFB-XL Pushbutton Activated Crosswalk System

TAPCO's pedestrian activated RRFB systems have produced 80% to 90% driver compliance in yielding to pedestrians at high-risk uncontrolled crossings. When activated, the LED arrays flash an FHWA specified, alternating 'wig-wag' pattern. Side-mounted LED arrays flash concurrently to advise pedestrians that the units are flashing. This is the highest yielding rate of all devices not featuring a red display, and up to 4 times greater than standard round beacons. RRFBs cost less than other devices with similar vehicular yield rates. The model available here includes all the hardware and components for a solar powered RRFB-XL pushbutton activated crosswalk system. Systems can be Custom Configured per Customer Request.

KEY SKU	MFG#	DESCRIPTION
B..... T25078	...RRFB XLRRFB-XL Pushbutton Activated Crosswalk System
B..... T25079	...RRFB DBLRRFB-XL Pushbutton Activated Crosswalk System, double sided

C, D - BlinkerBeacon™ Solar Flashing LED Beacon

For decades beacons have used as an enhancement or warning for busy crossings and heavy traffic areas. Recent LED improvement, new regulations for 12" lenses, and solar power have made this timeless device even more effective and more versatile. TAPCO's new BlinkerBeacon LED beacon incorporates these new features at a low cost-effective price. Available in single head or dual mount heads with various lens colors and bracket mounts. This system comes standard with 24/7 flashing operation. Beacons can be programmed multiple ways including timeclocks, pushbuttons and vehicle motion detectors. Multiple beacons can be synchronized in horizontal or vertical configurations.

KEY SKU	MFG#	DESCRIPTION
C..... T25065	...2180-BBSABBlinkerBeacon™ Solar Flashing LED Beacon, amber lens, black housing
C..... T25066	...2180-BBSRBBlinkerBeacon™ Solar Flashing LED Beacon, red lens, black housing
D..... T25089	...2180-BBDAB-26Dual Vertical BlinkerBeacon™ Solar Flashing LED Beacon, amber LED's

E - 12" Advance Warning Beacon

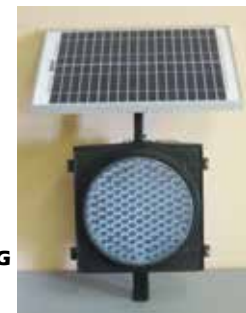

Attracts attention to important roadside signs or information and is ideal for a range of traffic applications. Road safety is heavily reliant on a driver's compliance with roadside signs, including speed limits, merging traffic, stoplights, etc. By using a solid state flashing beacon to draw attention to hidden, changing, or approaching road conditions such as an intersection not yet in view, the Advance Warning Beacon increases driver awareness and thereby enhances overall roadside safety.

KEY SKU	MFG#	DESCRIPTION

THE SIGN SHOP

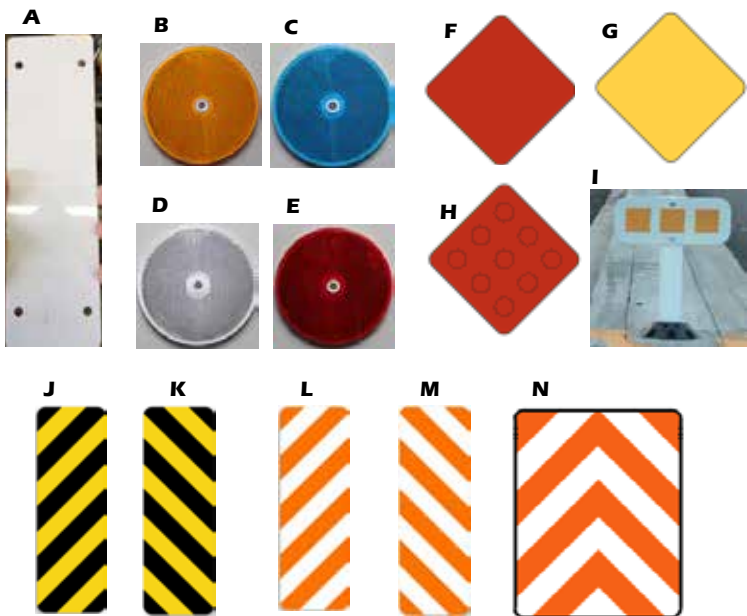

**Traffic Signs • Commercial & Industrial Signs
Street Signs • Custom Signs • Logos & Decals**

Statewide can help you determine the right signs and installation specifications for your project. Our extensive knowledge of current MUTCD and Caltrans specifications ensures that your sign installations will be in compliance with state and local regulations. Our products include MUTCD Compliant traffic control signs, street signs, custom signs, work zone signs, commercial and industrial signs, logos, decals, sign hardware and materials.

GRACO LINE STRIPERS

THE FIFTH GENERATION OF LINE STRIPING HAS ARRIVED

LineLaser V 3900 with the LineDriver. See page 18 for more info on the LineDriver.

A - LineLaser 3400

The LineLaser 3400 is the proven performer for your restripe jobs. As the preferred choice for 1-gun professional performance, the LineLaser 3400 is perfect for small parking lots, mini malls, seal coating contractors, schools and park and recreation departments.

- Operator controls are located right at the handle bars – fine-tune the strippers operation without stopping production!
- Handle bars are designed for more comfort and better control.
- Swivel front wheel makes striping up to the curb easier. Stripe arcs and curves with ease.
- Electronic pressure control provides excellent line quality.
- Chromex pump rod is built for the most demanding striping applications.

Graco LineLaser V Airless Line Stripers

Graco, the first company to offer airless spray technology is now the first again. With the introduction of LineLaser V, now striping contractors can have truck like features in a walk-behind striper. How? New automatic and semi-automatic striping technology with the push of a button. Breakthrough innovations in the new Auto-Layout II System, EasyMark Gun adjustment system and Data Logging, as well as the new LiveLook Display, clearly position LineLaser V as the preferred choice for quality, performance and productivity.

Standard Series Features:

For Everyday Striping

New EasyMark Gun Adjustment System

- Simple guide mark system
- Easy gun on/off, front/back
- Perfect gun set up - every time

New EZ Align Front Wheel System

- Keeps unit tracking straight
- Intuitive design

New DualComfort Handle Bar System

- Fits all users - easy to adjust
- Solid 4-bolt design

New LiveLook Display with SmartControl

- Tracks all aspects of the job
- Real-time information

HP Automatic Series Includes All Standard Series Features PLUS:

For Tougher Jobs

Automatic Guns

- Push button control for accurate stripes every time

Auto-Layout II

- Cuts layout time in half
- Exclusive Green Laser Guidance

Data Logging with J-Log System

- On-board job information for proof of completion

On-Board Power

- 12V battery for all your accessory items

HP Reflective Series Includes All HP Automatic Series Features PLUS:

For Your Most Demanding Jobs

EZ Bead Pressurized System

- Innovative bead tank with unmatched performance
- Provides perfect bead embedment
- Air valves to dial in starts and stops
- Installed and ready to go
- Dual Bead Tanks hold up to 240 lbs of beads (120 lbs each)

B - LineLaser V 3900

The LineLaser V 3900 is the airless line striping choice for professional striping contractors who want the industry's best striping unit. When it's time for 2-gun performance, no one does it better than Graco. Designed to deliver the most precise and consistent lines in the industry, it is the perfect choice for new lot layouts, medium to large parking lots, small city jobs and even big malls. With the option to add a LineDriver, the performance of the LineLaser V 3900 is unmatched.

C - LineLaser V 5900

The LineLaser V 5900 continues to be the mid to heavy-duty striping solution for professional contractors who recognize the increased productivity this leader delivers. With its ability to use 1 or 2-gun airless paint guns there are no jobs too big or small for the LineLaser V 5900 – large parking lots, city streets and everything in between. Known for years by professional contractors for its productivity, the innovations of this new generation positions the 5900 to again exceed all expectations.

A - LineLazer 130HS

The LineLazer 130HS is the ultimate hydraulic airless striping unit that contractors rely on for their most challenging striping jobs. Professional striping contractors wanting hydraulic performance and proven power cannot go wrong with the LineLazer 130HS. As the preferred hydraulic striper for everyday jobs, it consistently delivers solid performance day in and day out.

- EasyMark Gun Adjustment System—Simple guide mark and gun placement system allows for perfect gun set up every time
- High-capacity Cooling System—Keeps the system running cool
- Storage Compartment—Storage area for tips, guards and miscellaneous items
- DualComfort Handle Bar System—Fits all users and is easy to adjust
- EZ Align Front Wheel System—Intuitive design keeps unit tracking straight
- QuickSelect Gun Selector—Chrome gun lever for ease of use and dependable operation
- Honda Engine—Excellent power and proven reliability
- Endurance Paint Pump—Industry best performance and proven design with 25 years of success

B - LineLazer V 200HS

The LineLazer V 200HS is the high performance hydraulic striper you'll want for your most demanding jobs. Its proven history of innovative features has made it the striper of choice for contractors demanding a true workhorse. The LineLazer V 200HS is the perfect unit for large parking lot jobs, airports, and city jobs that not only require precise line but also demand reflective beads. With high production features such as automatic and semi-automatic paint guns along with the EZ Bead pressurized bead system, this unit has no equal.

C - LineLazer V 250SPS

Self-Propelled Line Striping System with the exclusive automatic paint guns makes the LineLazer V 250SPS the preferred striper for professional contractors who demand hydraulic power. This striper is ideal for large, heavy-duty line striping jobs including parking lots and road jobs.

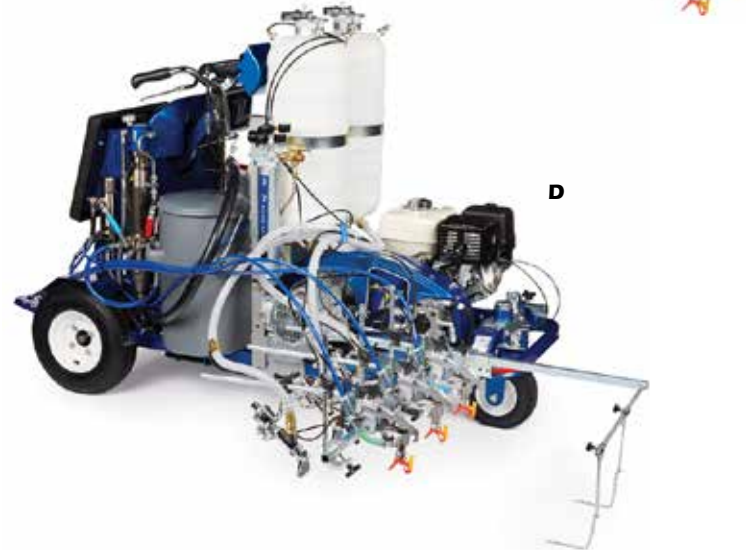

- Automatic Gun Control System—Manual or automatic paint and bead guns with the push of a button
- Electric Clutch System—Disengages engine for fast starting 25-Gallon (95 L) Paint Hopper-Extended striping time with large capacity hopper
- Honda 13 HP GX Engine—Electric Start-Industry proven performance with the most demanded engine by contractors
- Remote Mount - Control Box—Simple to use and easy to see in all conditions. Information at-a-glance
- Graco Hydraulic Motor System—Graco's no-stall hydraulic motor for uninterrupted performance
- Flex Plus® Guns—Industry proven paint guns with LineLazer tips provide precise lines
- Endurance Piston Pump System—Long life pump provides precise flow for wide range of striping materials
- Rear Gun Mount System—Provides straighter long lines—perfect for bike paths, airports and other long line jobs
- Self-Centering Front Wheel—Eliminates one user interface for simpler operation. Foam filled for stability

D - LineLazer V 250DC

Dual Color Line Striping System. Ideally suited for airports, municipalities, DOTs or anyone who needs to spray highlight lines or other dual-color striping.

- Dual Graco Hydraulic Motors—No-Stall design provides uninterrupted performance
- Dual Endurance® Displacement Pumps—Provides precise flow for a wide range of striping materials
- Exclusive Self-Centering Front Wheel—Provides simpler operation
- Exclusive Stand-On Platform—Provides ergonomic place for standing, great view and all-day comfort
- Dual 15-Gallon Paint Hoppers—Simultaneously spray two colors and refill less often
- Front or Rear Gun Mount—Use up to six guns to create straighter long lines
- Flex Plus Guns—Industry proven paint guns provide precise lines
- Graco Bead Guns—Reliable design delivers proven performance
- Dual Bead Tanks—Holds up to 240 lbs of beads (120 lbs each)
- Honda 13 HP GX Engine—Electric start for ease of use

LINEDRIVER, THERMOLAZER, GRINDLAZER & FIELDLAZER

A - LineDriver HD Ride-On System

Connect the LineDriver HD to your LineLazer striper to double your striping productivity. The LineDriver HD attachment provides the most innovative, user friendly ride on systems for the professional striping contractor.

- Exclusive FlexBeam™ Break-A-Way Light System. Fully adjustable for all types of low light applications. The Break-A-Way design helps protect against costly repairs and keeps you on the job.
- Patented Dual Foot Pedal System for forward and reverse.
- Exclusive ProStart™ Engine Starting System
- Honda Engine. Compact, lightweight and powerful, Honda engines are reliable, technologically advanced and easy to start.

B - ThermoLazer ProMelt w/ 4" SmartDie

Introducing the world's first fast melt, on-board handliner – ThermoLazer ProMelt System by Graco. Now, for the first time, it's possible to melt up to 300 pounds of thermoplastic material (6-50 lb bags) in a handliner in less than one hour! No one else can do this and we're proud to say that this patent pending system will soon become the new industry standard for years to come. SmartDies available up to 12".

- QuadMelt System - Four chamber system melts 300 lbs of material in less than 1hr.
- ControlFlow System - Precise material flow control with a squeeze of a lever.
- SplitBead Hopper - Holds over 90 lbs (40 kg) of reflective glass beads.
- SmartDie II System - Now use with or without heat for all weather conditions. Floats with the surface.
- EasyGlide System - First thermoplastic line striper with dual rear wheels and Fat Track Front Swivel for smooth LineLazer-like handling.
- SmoothRide Tires - High-load pneumatic tires provide excellent maneuverability and less rolling resistance.
- Optional Double-Bead Drop System Kit: installs in minutes for superior retro reflectivity.

C - ThermoLazer 200TC w/ 4" SmartDie

The Graco ThermoLazer 200TC Thermoplastic Handliner incorporates the same proven technology found in Graco's larger ThermoLazer but in a smaller unit that's ideal for contractors who are looking to grow their business or are just getting into thermoplastic striping. SmartDies available up to 12".

D - GrindLazer 390 Scarifier w/10" 8pt Full Cut

The GrindLazer 390 is the contractor choice for all-around scarifying jobs including parking lot lines, intersection markings, construction zones and sidewalk smoothing. With the optional LineDriver system its productivity is unmatched and means you can get more work done every day without the fatigue from walking.

E - FieldLazer S90 Field Marking Machine

An industry first, the FieldLazer S90 battery powered high-pressure field marker. Battery powered simplicity is now combined with Graco's professional, paint saving high-pressure technology.

- Graco high-pressure airless paint spray technology - Produces bright lines from every angle, coats both sides of grass blade in a single pass and reduced paint consumption vs. low pressure systems
- One Button Operation - Add paint and press the button to start – it's that easy!
- 12V Rechargeable, Maintenance Free Battery - 10 soccer fields or 1 football field per charge
- Eco-Friendly - Eliminates aerosol can waste, conserves paint and water, no emissions or propellants
- Tilt-N-Pour Removable 6 Gallon Hopper - Quickly pour and save unused paint; remove for additional cleaning ease

F - FieldLazer S100 Field Marking Machine

Introduced in 2004, the original FieldLazer striper was the first walk-behind field marker utilizing proven Graco high-pressure airless paint spray technology. It is now recognized by field marking professionals as one of the top walk-behind field marking machines available.

- High efficiency Honda engine
- Exclusive tall-wheel cart rolls easily over ruts and cleat marks, resulting in less operator fatigue and straighter lines
- Easy Out Filter makes tip clogs a thing of the past
- Siphons from disposable paint bucket, eliminating tank or pot cleaning hassles
- Paint circles and arcs or easily switch to gun and spray stencils or large solid areas
- Fold-Down Handle makes transportation easy

A - LineLazer RAC 5 SwitchTips (yellow handle)

- Creates clean, laser-sharp lines with no fuzzy edges or thin spots
- Designed specifically for parking lots, roads, warehouse floors, crosswalks and athletic fields
- Sprays heavy water-base to thin alkyd traffic paints
- Ensures consistent paint thickness, from edge to edge, less overspray and long-lasting lines

B - Tip Guards

C - Pump Armor™ Fluid

Protects pump for storage and freeze proof to -30° F (-34.4° C). Fill pump with Pump Armor fluid and leave it in until you use it again.

D - TSL™ Throat Seal Liquid

Prevents paint and coatings from drying onto the displacement rod and packings. Extends pump life.

KEY SKU	MFG#	DESCRIPTION
C.....M08020	..243103 Pump Armor Fluid, 1 qt., protects pump for storage and freeze proof to -30° F
D.....M08019	..206994 TSL Throat Seal Liquid, 8 oz., prevents paint and coatings from drying onto the displacement rod and packings

E - ThermoLazer SmartDie II

The SmartDie II System is the industry standard in screed box technology—only from Graco. It's innovative design allows users to use it with or without direct heat allowing more flexibility in all weather conditions. The 4-torch die heat system (standard on ThermoLazer ProMelt) allows contractors to optimize and extend their thermoplastic striping opportunities, especially in cooler climates.

The unique "floating" die design allows the die to float with the constantly changing surfaces allowing the best possible line to be put down—every time. The no-tool die change out system makes it fast and simple to change out your dies when switching between different width lines commonly found in intersection jobs.

COLOR-SAFE PAVEMENT MARKINGS

Color-Safe® Pavement Markings

SAFETY - Color markings are being used around the country to delineate bike lanes, bus lanes, crosswalks and pedestrian safety areas. As more cities are creating complete streets, the sustainability of the material used for color lanes needs to be considered.

DURABILITY - Transpo's Color-Safe® MMA marking material is not only one of the most durable markings on the market, but it can be applied in cold weather extending the marking season. Due to their high durability and color stability, MMA road markings cost less in maintenance and material costs over the extended lifecycle of the markings

Applications include: Bike Lanes, Bus Lanes & Stops, School Zones, University Campuses, Emblems & Mascots, Intersections, Roundabouts, Walking Paths, Toll Lanes, Speed Zones, Turns & Curves, Hazardous Road Areas, Industrial Plants, Airfield Marking.

Features and Advantages:

- Variety of Standard and Custom Colors, Aggregate Types and Sizes Available
- Durable Skid-Resistant Surface
- Excellent Color Retention
- Easy Application
- Fast Cure in a Wide Range of Temperatures (40°-100° F)
- Low Life Cycle Cost
- Strong Adhesion to Concrete and Asphalt Surfaces
- Resistant to Snow Plow Abrasion
- No Special or External Heat Source Required for Installation

Color-Safe® Bike & Bus Lanes

Colored lane surfacing is a safety feature that communicates to road users that a portion of the roadway has been set aside for preferential or dedicated use by bicyclists and buses and serves as a continuous reminder to drivers of the possibility of the presence of these as they merge or change lanes.

Color-Safe® Durable Pavement Markings are the most cost effective, high definition color marking on the market today. This innovative system is supplied with pre-packaged aggregate making application easy and durable and able to withstand bike traffic and vehicular traffic.

Color-Safe® Methyl Methacrylate (MMA) resin component is capable of full cure in a wide range of temperatures therefore extending the marking season and increasing productivity.

Color-Safe® is applied in a single application. No special spray, mixing equipment or heat is required for installation and MMA symbols and striping develop a strong bond to existing MMA, so look to Color-Safe® as a viable alternative to thermoplastic markings on both concrete and asphalt surfaces.

Color-Safe® Durable Airfield Markings

Transpo Industries Color-Safe® is a methyl methacrylate (MMA) resin system used to produce the most durable, cost effective, high definition color airfield markings on the market today. Color-Safe® Durable Airfield Markings are user-friendly, have excellent color retention and will strongly adhere to asphalt and concrete surfaces. With the addition of glass beads or skid-resistant aggregate, this innovative product can be easily modified to suit the specific marking needs of any airfield.

Color-Safe® markings are available in Standard and Custom Colors including White, Red, Yellow, Black, and Pink. You can enhance the conspicuity of the markings by adding glass beads to the Color-Safe surface.

Color-Safe® conforms to FAA regulations for taxiway and runway markings: AC 150/5370-10F - Standards for Specifying Construction of Airport.

HIGH FRICTION SURFACE TREATMENT, DISPENSING EQUIPMENT

High Friction Surface Treatments

High friction surface treatments significantly increase surface friction reducing run off the road accidents on hazardous curves. Transpo offers two binders for HFST, Transpo's T-28 HFST Methyl Methacrylate (MMA) resin binder and Transpo's T-526 HFST Epoxy resin binder. Both are capable of rapid cure on concrete and asphalt surfaces, and when incorporated with broadcast aggregate these high friction surface treatments can greatly reduce accident and fatality rates on hazardous roadways.

T-28 High Friction Surface Treatment

T-28 HFST is a Methyl Methacrylate resin binder that can be applied on both asphalt and concrete pavements, and when incorporated with broadcast aggregate these systems add increased skid resistance that can greatly reduce accident and fatality rates on hazardous roadways.

The binder can be applied manually or with automated equipment and is capable of rapid cure in one hour or less in a wide range of temperatures.

T-526 Epoxy Resin Binder High Friction Surface Treatment

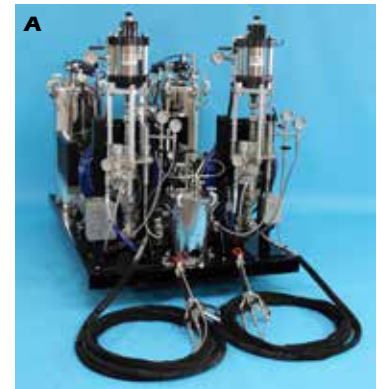

T-526 HFST is a two-component epoxy resin based binder. The binder can be applied to both asphalt and concrete, manually or automatically, and is capable of rapid cure in three hours or less at temperatures above 50° F.

When incorporated with broadcast aggregate this system adds increased skid resistance that can greatly reduce accident and fatality rates on hazardous roadways.

A - KoldSpray MMA 98:2 Methacrylate Airless Spray System

- KOLDSpray Plural component airless spray gun specifically designed for highway marking industry
- Easily changed disposable static mixer mixing system
- Skid mounted to fit in standard pick-up truck
- Easily adaptable to existing paint trucks
- Pressure compensated hydraulic pump
- Over and Under pressure safety sensors

B - BigShot Bituminous Applicator

- Digital electronic temperature controls provide precise control for the material and the wand
- High temperature silicone duckbill valve with guard minimizes dripping between shots of material
- 18 horsepower Kawasaki engine is converted to run on propane fuel
- In tank hydraulic filter is quick and easy to change when required
- Large material fill port accepts all standard bituminous adhesives
- Lightweight ergonomically designed dispense wand with electric trigger switch

C - 160SP Epoxy Mixing Machine

The 160SP Epoxy Machine is a portable meter, mix and dispensing system for 1 to 1 ratio epoxy. It was designed to withstand the day to day rigors of the pavement maintenance and construction industries. Raised pavement markers, dowel bars and temporary construction zone delineators are only a few of the uses for this machine. The heart of the system is Dispensing Technology's simple and durable positive displacement pumps. Mixing is accomplished with a low cost, maintenance free disposable static mixer. The two materials remain separate until they enter the disposable mixer. Thoroughly mixed and properly proportioned material is delivered at the push of a button. The shot size can be varied by a moving a simple limit switch. This allows the operator to optimize the amount of material used for each application. This closed metering and mix-ing system minimizes the operator's expo-sure to the material fumes and virtually eliminates the mess of hand measuring and mixing.

D - KoldPath Structured Marking Applicator

- Digital electronic controls provide precise control for the skip line, mixer, extrude gate and spike bar coordination
- State of the art extrude head with CleanFlow UHMWPE head, carriage mounted dynamic mixer and all valves required
- 49 horsepower Perkins diesel engine with engine monitoring control module including over temperature and low oil warning sensors
- Conveniently mounted pneumatic controls between operator stations show system pressure and all critical functions required for operation
- Gun carriage and applicator head can be seen easily from operator position allowing monitoring of line quality and line pointer at front of vehicle.
- Center mounted control pod for control of carriage extend, retract, light bar, safety beacons Catalyst low pressure alarm and emergency stop button

TRAFFIC PAINT, GLASS BEADS

Line-PRO™ Traffic Markings

A - Line-PRO™ 1000 Series Parking Lot, Athletic Field, & Dirt Resistant Striping and Curb Marking Paint

Line-PRO 1000 series comes in a variety of products that include Standard Dry Parking Lot Paint, Zero-VOC Athletic Field Paint, as well as Fire Lane Red, ADA Blue, and Limited Parking Green Curb Paint. Line-PRO 1000 products are durable and extremely UV resistant, providing years of service without color fade.

B - Line-PRO™ 2000 Series Fast Dry Airport Runway Striping & Marking Paint

Durable and fast drying, Line-PRO 2000 is the premier product for Airport Runway striping and marking. Line-PRO 2000 is formulated specifically to meet Federal Specification TT-P-1952F, Type I/II, which allows its use on most federally funded projects.

C - Line-PRO™ 3000 Series Fast Dry State Specification Traffic Paint

Line-PRO 3000 meets California's Department of Transportation (CALTRANS) PTWB-01 R2 requirements for pavement delineation on highway construction and maintenance projects. Line-PRO 3000 is a 100% acrylic, fast-drying, waterborne traffic paint that contains no heavy metals and has field proven durability.

D - Line-PRO™ 4000 Series Low Temperature Solvent-based Striping & Marking Paint

Line-PRO 4000 is a series of solvent-based traffic paints which have been formulated for striping and marking in temperatures as low as 0 °F. Both Low VOC and High VOC formulations are available. Colors include White, Yellow, Black, Fire Lane Red, ADA Blue, and Limited Parking Green.

E - Line-PRO™ 6000 Series Rapid Dry Premium Performance Striping & Marking Paint

Line-PRO 6000 is a proprietary formulation that will meet or exceed the performance of state and federal specification traffic paints. Formulated with carefully selected raw materials, Line-PRO 6000 is a fast drying, long lasting traffic marking that has proven to withstand harsh weather and heavy traffic road conditions.

F - Line-PRO™ 7000 Series Stencil Guard and Temporary Striping & Marking Paint

Line-Pro 7000 is a Series of products ranging from Stencil Guard to Temporary Construction Zone Paint. Line-PRO 7001 Stencil Guard provides an easier cleanup of aluminum, wood, or plastic stencils. Line-PRO 7010 is a temporary traffic marking paint that allows quick lane delineation changes.

G - Pavement Marking Reflective Glass Beads

Embedding glass beads into highway safety markings creates reflective lines that shine through darkness, rain, and fog to direct drivers more safely along the road while reducing drying time and subsequent tracking, and increasing the effective life of the line up to 50% because the bead surface resists traffic abrasion.

A - Thermoplastic Pavement Marking Mix

TuffLine® Alkyd is an oil and grease resistant, durable, thermoplastic pavement marking material. Maleic modifications to the base resin impart polar characteristics to the thermoplastic system which promote excellent retention of glass spheres. The cold flow properties of TuffLine® impart resistance to freeze thaw cracking. TuffLine® has an excellent color, fluidity and heat stability. It is available in formations suitable for screed/extrude or ribbon and spray applications. TuffLine® can be applied using conventional application equipment and can be applied over existing hydrocarbon and alkyd pavement markings.

B - Intersection Grade Thermoplastic

Intersection Grade Thermoplastic is designed to provide a consistent application of a skid resistant marking, while providing retro-reflectivity throughout the entire marking. It is designed to be used on crosswalks, turn arrows and bike legends, stop bars, or anywhere else pedestrians, motorcyclists, or cyclists could be injured. Helps minimize skidding, slipping, or falling.

Intersection Grade Thermoplastic is applied at 390-425F and 100-125 mils thick, using standard hand equipment with double drop bead system. The surface coating blend contains glass spheres, and ceramic antiskid particles. The first and second drops utilize the same surface coating blend. The first drop properly embeds the larger particles in the blend while the second drop embeds the smaller particles in the blend. Intersection Grade Thermoplastic doesn't stop at the surface coating. The thermoplastic material itself contains ceramic antiskid particles throughout the material designed to provide continued slip and skid resistance long after the surface has been abraded away. Quick dry time minimizes traffic disruption and worker exposure.

C-I - Stencils

1/8" gauge Polyvinyl stencils will withstand heavy use. Stencils are all designed to meet D.O.T. specs nationwide. Layout and designs follow through to the smallest stencil, allowing you to create more visible and proportioned markings. Stencils are easy to transport, lighter than wood or metal and clean up easily. Stencils will always lay flat, yet will flex to conform to any surface—smooth or rough. Apply paint with brush, roller or spray equipment. When paint dries, it simply flakes off. Unlike wood, aluminum or other stencils, our stencils will not break, bend, crease, warp or load up with paint.

PAVEMENT MARKING TAPE, PREFORMED THERMOPLASTIC

A - 3M™ Stamark™ Pavement Marking Tape Series 270 ES

3M™ Stamark™ Pavement Marking Tape Series 270 ES are durable, patterned tapes with a polyurethane top coat for long-term retained whiteness and a reinforcing net in the adhesive layer to minimize shear and tearing in the intersection environment.

While these tapes can be applied without surface preparation adhesive during the typical tape season, addition of surface preparation adhesive in early spring and late fall enables to extend the marking season by several months.

B - Alta Preformed Thermoplastic

Alta Preformed Thermoplastic is a durable pavement marking system where thermoplastic lane lines, legends and symbols are supplied pre-cut and can be easily installed without specialized equipment. Preformed thermoplastic pavement marking material combines the convenience of pre-cut markings with the performance qualities of hot applied thermoplastic.

Engineered for enhanced visibility both day and night, Alta preformed thermoplastic pavement markings are made with Alta's brilliant glass beads which are distributed throughout the material during the manufacturing process. As the material wears down additional glass beads are exposed thus ensuring exceptional retro reflectivity during the life of the preformed thermoplastic pavement marking.

RAISED PAVEMENT MARKERS & ADHESIVES

A-C - Abrasion Resistant Retroreflective Pavement Marker

Apex abrasion resistant markers are resistance to lens cracking and designed to provide superior retro reflectivity and a longer marker life.

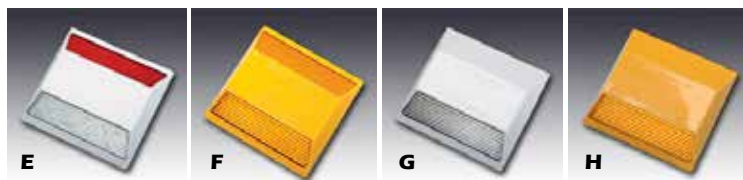

KEY	SKU	MFG#	DESCRIPTION
A	M02260	.921 A/R B	white housing, 2-way clear/clear lens, 4" x 4" x 0.75"
B	M02247	.921 A/R C	white housing, 2-way red/clear lens, 4" x 4" x 0.75"
C	M02248	.921 A/R D	amber housing, 2-way amber/amber lens, 4" x 4" x 0.75"

D-H - Retroreflective Plastic Pavement Markers

Markers consist of an ABS plastic shell filled with a tightly adherent potting compound. The shell contains one or two glass covered prismatic retroreflective faces as required to reflect light from a single or opposite directions.

KEY	SKU	MFG#	DESCRIPTION
D	M02134	.TYPE BB	blue housing, 2-way blue/blue lens, 4" x 4" x 0.75"
E	M02133	.TYPE C	white housing, 2-way red/clear lens, 4" x 4" x 0.75"
F	M02136	.TYPE D	amber housing, 2-way amber/amber lens, 4" x 4" x 0.75"

L	M02086	.TYPE AY CERAMIC	Non-Reflective Ceramic Pavement Marker, 4" round, yellow
M	M02252	.AYC	Non-Reflective Ceramic Pavement Marker, 6" round, yellow

N - 3M™ Raised Pavement Markers Series 290 PSA

Series 290 PSA are durable, lightweight thermoplastic markers with pressure sensitive adhesive that provide highly effective, long-life visibility, particularly at night and in wet weather. Markers may be applied to asphalt and concrete road surfaces in non-snowplow regions. The markers are impact resistant and increase awareness with an added rumble effect.

- Highly reflective and durable construction
- Variety of color combinations, including colors for hydrant and utilities location
- Easy to apply

O - Hot-Applied Bituminous Marker Adhesive

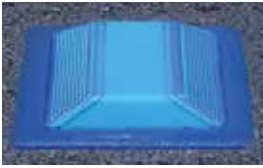

This sealant is a hot-applied bituminous material which, when properly used and applied, bonds markers and reflectors to both asphalt and concrete pavement surfaces. The adhesive is supplied as an easy to use single component material which is easily melted and poured or pumped onto pavement surfaces. Since it is a hot melt composition, the adhesive sets up on cooling and is ready for traffic in less than 5 minutes. Heating can be performed in either directly or indirectly heated melting units. The adhesive contains no rubber polymers which can degrade at application temperature.

P - QwikStix™ Adhesive

The CrafcO QwikStix is a fast and easy way to adhere pavement markers or do small crack repairs. The only tool required is a small torch. Peel back the self release cardboard box and melt just enough to do the job. Single markers or touch up to a crack sealing project are ideal for the QwikStix. QwikStix work equally well on AC or PCCP pavements.

KEY	SKU	MFG#	DESCRIPTION

P	M02153	.34567	QwikStix Adhesive

PAVEMENT MARKER ADHESIVES, ASPHALT PATCH

A

A - Bundy Adhesive Pads

Specifically designed to adhere Raised Pavement Markers (RPMs) to the road surface and provide a bond that will last throughout the marker's lifetime. Easy removal without damage to the road surface makes these ideal for use in work zones. Simply heat the pad and push a shovel underneath the RPM to lift it.

KEY SKU	MFG#	DESCRIPTION
A.....	M03269 .4277	Bundy Adhesive, Pads black, 5" x 5"

B

B - Road Marker Epoxy

Our rapid setting two-part gray road marker epoxy is the most reliable permanent adhesion product available. Typical applications include City Post anchor cups, channelizer posts, permanent installation of rumble strips and curb sections.

KEY SKU	MFG#	DESCRIPTION

B.....	M02238 ..80EPXYGLB1	Road Marker Epoxy, part B, 1 gallon

C

D

E

C - ET-HP® Epoxy Adhesive

ET-HP® is a two-component, high-solids, epoxy-based system for use as a high-strength, non-shrink anchor-grouting material. Resin and hardener are dispensed and mixed simultaneously through the mixing nozzle. ET-HP® is formulated for anchoring threaded rod and rebar into concrete (cracked/uncracked) and masonry. Applications: Highway / DOT, Brick: Solid, Concrete Block: Grouted, Brick: Unreinforced (URM), Concrete Block: Hollow (Ungrouted), Concrete: Cracked, Brick: Hollow.

D - EDT22S Manual Dispensing Tool

The EDT22S epoxy adhesive tool features a steel carriage and is engineered for high-volume, continuous use. The tool can be easily converted (conversion parts included) from dispensing a 22 oz. 1:1 ratio cartridge to a 16.5 oz. 2:1 ratio cartridge.

KEY SKU	MFG#	DESCRIPTION
C.....	A08056 ..ET-HP22	ET-HP® Epoxy Adhesive, 22 oz. side-by-side cartridge
D.....	A08057 ..EDT22S	Manual Dispensing Tool for 22 oz. cartridges
E.....	A08058 ..EMN221-RP10	Adhesive Mixing Nozzle with integrated nut, 10/pkg

F

F - Standard Set Epoxy

A two component standard set epoxy adhesive for pavement markers. Meets California State Specification 8040-11 D-09 and Arizona DOT. Primarily used in bonding pavement markers to Portland Cement and asphalt concrete. The Standard Set allows sufficient induction time to install markers by hand. Other uses include, bonding precast concrete on wheel stop parking lot, traffic cones top existing substrates.

F.....	A08049 ..535572	Standard Set Epoxy, part B, 1 gallon

AQUAPHALT®

Finally! A Permanent, Environmentally Friendly Asphalt Patch

Picked #1 by Consumer Reports!

- Eco-friendly binder reacts and hardens with only water—no toxic solvents.
- Aquaphalt is laid directly from its container—no need to mobilize large crews and equipment.
- Aquaphalt is a revolutionary, sustainable, environmentally friendly, permanent repair material for all asphalt and concrete road surfaces.
- Aquaphalt is used for repairing potholes, pavement damage, parking lots, utility cuts, tennis courts, walkways, bridge joints, manhole restorations, curbs, speed bumps, driveways, runways, taxiways, aprons, bridge decks, and many other repairs. It is a sustainable product that is easy to use and makes a truly permanent repair.
- First, and most importantly, it assures a permanent repair, as strong or stronger than the surrounding material, unlike conventional 'cold patch' asphalt products, which never deliver a truly permanent repair. Second, it actually saves you time and money, by eliminating costly repeat repairs. Third, it has no toxic solvents or VOCs, so it's safer and environmentally friendly. Existing repairs are over 14 years old and are just as strong and solid as of the day that the Aquaphalt was installed.

KEY SKU	MFG#	DESCRIPTION
.....	A08168	AQUAPHALT 4.0, 4mm aggregate for smoother finish, 55# bucket
.....	A08169	AQUAPHALT 6.0, 6mm aggregate, street/parking lot grade, 55# bucket
.....	A08170	AQUAPHALT 6.0, 6mm aggregate, street/parking lot grade, 2000# Super Sack

ASPHALT SEALANTS, TEMPORARY PAVEMENT MARKERS

A-D - DEERY Hot Applied Sealant

A moderately high viscosity pavement preservation sealant intended for highway, street and aviation applications for sealing longitudinal and transverse joints and random cracks in Asphalt or Concrete pavements where use of high levels of recycled material is desirable. Properly installed, DEERY Hot Applied Sealant is an effective barrier against damage from debris and moisture infiltration into cracks and joints within regions experiencing moderate high and moderate low pavement temperatures.

A - DEERY 180 Hot Applied Sealant - exceeds the requirements of ASTM D5078. VOC=0 g/l. Previously labeled as CMC #180.

B - DEERY 200 Hot Applied Sealant - conforms to the requirements of many state DOT specifications. VOC=0 g/l.

C - DEERY PLF210 Hot Applied Sealant - fast set up sealant. VOC=0 g/l.

D - DEERY 220 Hot Applied Sealant - conforms to the requirements of many hot climate specifications. VOC=0 g/l.

E - 34533 Superflex HT

CrafcO Superflex HT is a hot-applied asphalt based product used to fill cracks in asphalt, concrete or portland cement concrete pavements in moderate to hot climates. Superflex HT is supplied in solid form which when melted and properly applied forms an adhesive and flexible compound that resists cracking in the winter and is highly resistant to tracking or pick-up by vehicle tires in hot climates. Superflex HT is used in highway, street, airfield and parking lot pavements and is applied to pavement cracks using either pressure feed melter applicators or pour pots.

E.....A08128	..3453334533 Superflex HT Asphalt Sealant, 1 lb.

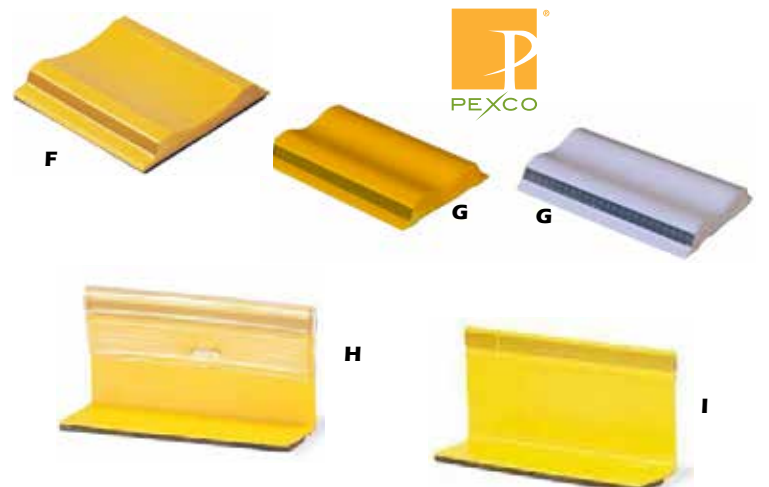

F, G - RPMs & Halftracks

RPMs and Halftracks are long-term temporary road markers designed for use on both low volume roads and interstate highways, providing clear guidance to motorists both night and day.

RPM Model 35 - The 4" x 4" double domed surface of our standard RPM creates a dramatic rumble effect, alerting motorist of lane change.

Halftracks - Roughly half the size of our RPMs, Halftracks offer an inexpensive way to augment painted lines and tape, greatly improving the nighttime visibility.

KEY SKU	MFG#	DESCRIPTION
F.....M02085	..8002577130RPM Type W-1, white 1-way
F.....M02163	..8002577190RPM Type W-2, white 2-way

G.....M02176	..8002689220Halftrack Type Y-2, yellow 2-way

H - TRPM Chip Seal Markers

TRPM chip seal markers hold the original lane line location in chip, slurry or fog seal road maintenance operations. Many products exist that claim to be easy to use and provide good delineation, but only TRPMs deliver. TRPMs are durable enough for use on both low volume and interstate highways.

In an era of decreased budgets and increased focus on safety, TRPM chip seal markers provide an opportunity for both improving safety and reducing costs. Quick, simple placement reduces the time that your crew is exposed to traffic. TRPMs can be installed in only seconds by one worker with no special equipment, providing high profile delineation on freshly sealed roads until permanent markings can be applied. Holding the original lane line location eliminates the need to survey prior to restriping the roadway.

I - Temporary Overlay Markers (TOM)

TOMs are a most effective and convenient product that provides short-term pavement markings that work effectively both day and night. They are simple to place and easy to remove. They are durable enough for use on any road, from low volume to interstate highways.

TOMs are manufactured with virgin engineering resins and the best retroreflective tapes and adhesives. All TOMs feature a factory-applied high tack butyl adhesive pad, providing for quick "stick-and-stomp" installation and can be installed in just seconds by one worker without the need of additional equipment.

KEY SKU	MFG#	DESCRIPTION

J - ID Locator Asphalt Paving Marker

Easily locate and identify striping and all types of water, gas, electric and sewer covers under freshly paved asphalt. Developed from a new recyclable elastomer, the ID Locator adheres to any surface and pops up after being paved over with up to 5 inches of asphalt for easy locating and identification.

Proven effective, this device will withstand truck tires, paving machine tracts and hot asphalt to pop - up after paving, leaving a safe, soft, flexible marker indicating the exact location of covers and striping. After paving, street crews can return days, weeks or months later to locate the paved over covers, caps, striping or monuments.

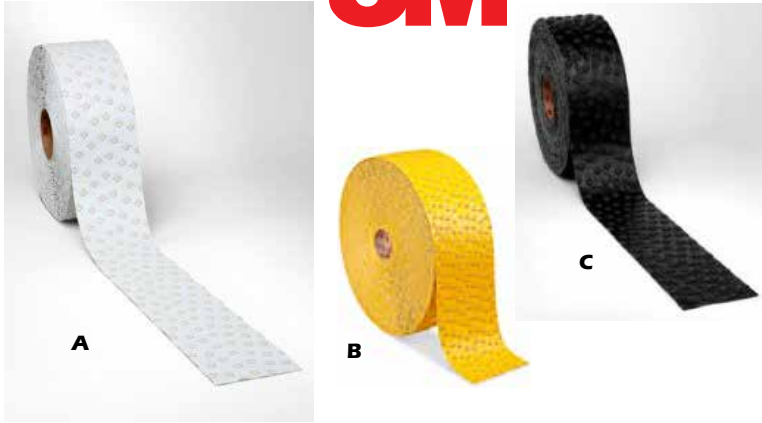

The ID Locator will withstand temperatures ranging from - 40 to + 450 degrees. Dimensions 3.5 inches square x 4 inches high.

REMOVABLE PAVEMENT MARKING TAPE

A-C - 3M™ Stamark™ Wet Reflective Removable Tape

Conformable, removable pavement marking tape intended for longitudinal line applications in construction work zones where removability is required.

- Highly reflective in wet or dry conditions
- Durable for normal work zone life
- Easy to apply, pressure sensitive adhesive eliminates the need for surface preparation adhesive
- Roadway may be opened to traffic immediately
- Removes cleanly leaving no “ghost” markings or scarring
- Reinforcing net for easy removability
- Raised pattern profile

KEY SKU	MFG#	DESCRIPTION
A..... M11038	..A710 24" Stamark Wet Reflective Removable Tape, white, 4" x 120'
A..... M11068	..A710 12" Stamark Wet Reflective Removable Tape, white, 12" x 120'
B..... M11069	..A711 4" Stamark Wet Reflective Removable Tape, yellow, 4" x 120'
B..... M11080	..A7116"X120 Stamark Wet Reflective Removable Tape, yellow, 6" x 120'
C..... M11075	..A715 8" Stamark Wet Reflective Removable Tape, black, 8" x 120'

ATM Removable Marking Tapes

The ATM line of removable tapes work together to safely and economically direct traffic around construction work zones. The pre-applied, pressure-sensitive adhesive extends the application season typically shortened by marginal weather conditions. Quick and easy installation: simply prepare the surface, apply the tape, and tamp in place. When the job is completed the reinforced fabric backing makes removal easy. Marked roadways can be opened to traffic immediately.

D - ATM 200 Removable Construction Tape

Recommended for construction projects up to one year. ATM 200 Marking Tape offers excellent daytime visibility for delineation and superior nighttime reflectivity.

E - ATM 280 Removable Hide-A-Line Tape

Provides a maximum service period of 12 months. ATM 280 Hide-A-Line installs quickly and easily over existing markings and eliminates costly removal of permanent road markings. The non-reflective, matte black color blends with asphalt surfaces providing an effective mask day or night.

KEY SKU	MFG#	DESCRIPTION
D..... M11005	..19-216W ATM 200 Removable Construction Tape, white, 4" x 360'

E..... M11025	..19-284 ATM 280 Removable Hide-A-Line Tape, black, 6" x 90'

F-G - Flex-O-Line™ FOL200 Construction Grade Tape

Flex-O-Line brand pavement striping tapes are conformable and highly reflective films which are designed to provide excellent nighttime delineation during either dry or light-to-moderate rainfall. Flex-O-Line™ tapes are weather resistant and provide excellent color retention. Experience has shown that the highly reflective “Wet Reflective” and “Construction Grade” tapes are generally more durable than conventional high quality paint, and will show no appreciable fading, lifting, shrinking or chipping when applied according to manufacturer’s instructions. Adhesive foil backing. Meets all state and federal requirements where applicable, and when removability is not a priority.

KEY SKU	MFG#	DESCRIPTION

A - Easy Rider® Speed Bump

Constructed from 100% recycled tires, GNR speed bumps are preformed to implement immediate installation. Molded highly reflective tape ensures that the speed bumps are visible even on a dark night. Cat's eye reflectors further enhance visibility to alert drivers well in advance. The bumps have a channeled bottom to facilitate drainage as well as to cover cabling or piping. Resistant to ultraviolet light, moisture, oil, and extreme temperatures. Temporary or permanent installation - Relocatable when resurfacing / maintaining road surfaces; products can be stored and re-used. GNR rubber speed bumps are covered by a 3 year warranty; 1 year on the tape (under normal use).

A

B - Safety Rider® Mini Hump

Mini speed humps are ideal for slowing traffic in school parking lots and crossings, playground areas, hospitals, parking facilities, and anywhere a slow traffic flow is required. Molded highly reflective tape provides optimal visibility even on a dark night, alerting drivers well in advance. Constructed from 100% recycled tires, mini humps are simple to install and do not require road closures. Plastic shields are inserted into pre-drilled holes and the units are bolted down to keep from shifting. The Safety Rider® can be easily removed for storage or relocation. Safety Rider® mini humps are covered by a 3 year warranty; 1 year on the tape (under normal use).

B

C - Park It® Parking Curb

Unlike concrete or plastic, which necessitate frequent replacements, recycled rubber car stops are safer and more durable. In-molded highway reflective tape ensures visibility and pedestrian safety. The GNR Park-It® parking curb is constructed of 100% recycled rubber and are lightweight (34 lbs. for a 6' car stop) and flexible; conforming to the contour of uneven road surfaces. Resistant to ultraviolet light, moisture, oil, and extreme temperatures. Temporary or permanent installation. Park-It® car stops are covered by a 3 year warranty; 1 year on the tape (under normal use).

C

D - Home Park It® Parking Curb

The Home Park It® is used to provide guidance to cars while parking as well as to protect the front of your vehicle. It provides worry free parking for garages, driveways, or carports.

D

E - Concrete Car Stop

Wet-cast using 4000 PSI concrete mix with large 1" Aggregate for strength and 2 pieces of rebar for reinforcement.

3' - 81 lbs. 4' - 108 lbs. 6' - 164 lbs.

E

F, G - Corner / Wall Guards

Manufactured from high-impact virgin rubber, these corner and wall protectors are long lasting, durable, and cost-effective solutions. High intensity reflective tape increases visibility - especially at night, and provides the necessary guidance to drivers when parking in tight spots.

Rubber corner and wall guards not only help protect your parking structure, but also helps protect your customers' vehicles from potential dents and scratches. Ideal for surface and multi-level parking lots, interior factory / warehouse walls, and areas surrounding loading docks.

KEY SKU	MFG#	DESCRIPTION
F.....G11132	..CG800 Corner Guard, 31.5"(L) x 3.5"(W) x .25" thick, 4 lbs.
G.....G11133	..WP1000 Wall Guard, 39.5"(L) x 6"(W) x 2" thick, 11 lbs.

PAVEMENT MARKING LAYOUT

A, B - Dixon Railroad Chalk

For temporary markings on metal, wood, stone, and paperboard since 1835. This smooth marking chalk is ideal for bright temporary marks.

C - Half-Moon Marking Chalk

Used on rail cars, concrete, asphalt, wood and other surfaces, this chalk is ideal for layout work and marking for estimating.

D, E - Giant® Chalk Line Reels

Our GIANT® brand is big — so it can hold a lot of string and a lot of chalk. If you're snapping dozens of lines, or need big bold lines, grab a GIANT® and make your mark. ABS housing and metal handle.

G100 FEATURES: 100 feet heavy-duty cord and pull ring. Hooks easily onto tool belt and holds almost a pound of chalk. One-piece steel crank for long life.

G150 FEATURES: 150 feet heavy-duty cord and pull ring. Holds over a pound of chalk for fewer refills. One-piece steel crank for long life.

F - ProChalk® Standard

For your basic chalk line needs that are easier to clean up or let wear away naturally.

G - ProChalk® Semi-Permanent

For weather- and water-resistant lines that hit and stick for a long time but will eventually wear away naturally.

H - Striping Paint - Solvent Based

Solvent-based striping paint adheres to a variety of surfaces, including asphalt and concrete. Not recommended for turf surfaces.

Fast drying - 5 minutes to touch, Durable, long-lasting stripe, High-visibility colors, VOC compliant and lead-free, Non-clogging spray tip, Excellent resistance to traffic, oil and gasoline. One case of aerosol paint will yield a 4-inch stripe approximately 700 linear feet. Applications: parking lots, warehouse aisles, school yards, tennis courts, and factory safety aisles.

I - Survey Marking Paint

A superior upside down marking paint with excellent visibility and durability. Regular and fluorescent colors are visible for up to 6 months depending on traffic and exposure. Fluorescent colors last 3 to 6 months. Use with Spot Marker gun, Marking Stick, or by hand. Adheres to almost any surface, including wood, concrete, asphalt, brick, and gravel.

J - All Purpose Marking Paint

This multipurpose purpose marking paint provides a very cost-effective approach to marking with good visibility. Spray on any surface. Self-cleaning tip. Mark lasts 2 months.

K - Aervoe Marking Chalk

A blend of raw materials that are safe on all surfaces for temporary marking. Mark will disappear in 10 to 20 days when exposed to water, traffic and other abrasions. It can also be removed with a pressure washer. Safe for turf surfaces, Adheres to pavement, gravel, soil, and grass.

BOLLARD COVERS & DETECTABLE WARNING MATS

Ideal Shield Bollard Covers

Made of Low-Density polyethylene thermoplastic (LDPE) with UV protection to prevent fading. Patented installation tape included to secure a permanent fit. Available in 1/8" or 1/4" thickness in diameters of 3", 3 1/2", 4", 5", 6", 7", 8" and 10" up to 84" tall. Available in 10 standard colors. Custom colors and custom logos available (mold-in or mold-on graphics). Square and decorative bollards also available.

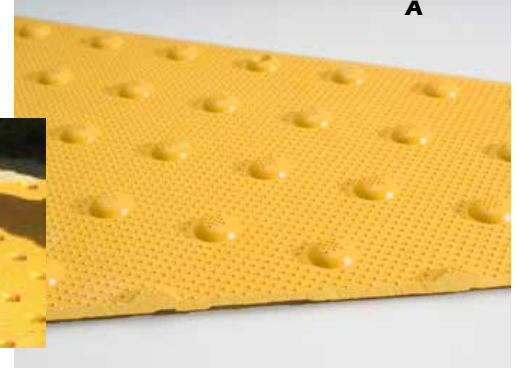

A - Surface Applied Truncated Dome Detectable Warning Mat

Surface Applied Tactile is made of a colorfast and UV stable homogenous glass and carbon composite with fiberglass truncated domes for enhanced durability. The Surface Applied Tactile is used to retrofit over an existing concrete substrate and can be installed in as little as 10 minutes.

All of our truncated dome tactile surfaces are in full compliance with the American Disabilities Act Accessibility Guidelines (ADAAG), Public Right-of-Way (PROW) and California Title 24 Requirements. ADA Solutions Inc., products are approved for use by all major municipalities, DPW's and state DOT's.

KEY SKU	MFG#	DESCRIPTION

C - RediMat™ Detectable Warning

The original surface applied RediMat detectable warning is constructed of extremely durable, UV protected polyurethane. This flexible mat has a proprietary pre-applied adhesive system that enables installation in less than 10 minutes, drastically reducing labor time and expense, but not at the expense of durability. RediMat – Install in Minutes, Comply for Years.

- No adhesives to apply – simply remove protective backing, exclusive peel and stick technology
- Installs on both asphalt and concrete – multi-surface adhesive system
- Conforms to uneven surfaces – flexible polyurethane material
- Unbreakable – will not chip, crack, or splinter
- Radius Ready – Available in "Wedge" shape
- Beveled Edge – For easy pedestrian access
- Includes stainless steel anchors to meet DOT requirements

D - alertcast® Detectable Warning

alertcast® is reinforced thermoset plastic engineered for superior impact resistance, slip-resistance, wear-resistance and long term durability. Our exclusive design incorporates a top panel of truncated domes molded to exact ADA specifications for detectable warnings and bottom docking anchors that are embedded into wet concrete. The special concrete anchors lock the part securely into the concrete without trapping air beneath the part's surface. While incredibly strong, this system is actually very lightweight and very easy to work with during installation.

MESSAGE BOARDS

Mini Three-Line Message Board

Full-Matrix Message Boards

Metro VMS Message Board

Truck Mount Matrix Message Board

A - Full-Matrix Message Signs

Full-size, full-matrix Wanco Variable Message Signs are the ideal choice when you need to get information to the public. The full matrix allows the greatest flexibility for displaying any type of message — large or small letters, graphics and symbols. Perfect for a wide variety of applications, a multitude of functions and options make these signs extremely versatile. 138" x 75".

KEY	SKU	MFG#	DESCRIPTION
A.....	T20045	...WTMMB(A)....	Full-Matrix Message Sign, hydraulic lift
A.....	T20046	...WTMMB(B)....	Full-Matrix Message Sign, manual winch

B - Mini Matrix Message Signs

The Wanco Mini Matrix Message Sign is a compact version of our full-size variable message signs. Like our full-size signs, the Mini displays a full-matrix of bright, highly visible LEDs. About 30% smaller, the Mini trailer is highly maneuverable and easy to deploy. Use the full-matrix display to present message text and symbols in almost any application — for traffic safety, emergency response, and special events. 96" x 55".

KEY	SKU	MFG#	DESCRIPTION
B.....	T20047	...WVTM(A).....	Mini Matrix Message Sign, hydraulic lift
B.....	T20048	...WVTM(B).....	Mini Matrix Message Sign, manual winch

C - Three-Line Message Signs

The Wanco Three-Line Message Sign is capable of displaying three rows of alphanumeric characters. When you need to get information to the public, the Three-Line's highly legible, ultra-bright LEDs display your message clearly. Unsurpassed quality, engineering and value, paired with a multitude of functions and options, make this sign perfect for a wide variety of applications. 138" x 75".

**RENTALS
AVAILABLE**

A - WJECO® Folding-Frame Arrow Boards

Wanaco® arrow boards are portable and self-powered, requiring no permanent installation or wiring. Arrows and other patterns are selected by the user.

Wanaco Folding Arrow Board Trailers feature a display panel that pivots up to the vertical position when deployed, and down to the horizontal position for transport. The display is held in place with a single support for ease of use.

Wanaco trailer-mounted arrow boards feature WJECO® technology, a highly efficient power system. With Wanaco's exclusive LED lamps and small, eco-friendly batteries, WJECO arrow boards are extremely energy-efficient without sacrificing performance. Power is provided by batteries, which are charged by an automated solar charging system. With sufficient sunlight, WJECO arrow boards can run indefinitely without intervention. 96" x 48".

KEY SKU	MFG#	DESCRIPTION
A..... T30090	...WTSP55-LSACArrow-board trailer with 25-light display pane

B-E - Wanaco Vehicle Mounted Arrow Boards

Arrow boards direct traffic by flashing a brightly lit arrow pattern on a large, highly visible display panel. Wanaco® Truck-Mount Arrow Boards provide an obvious solution for convoys, crash-cushion (TMA) trucks and emergency repair crews. Installed over the cab or in a truck bed, power is provided by the truck's power system. Arrows and other patterns are selected by the user using the arrow board controls inside the truck cab.

Features: High-output amber LEDs, selection of arrow and other display patterns, easy to operate and maintain, controller located inside truck cab, control box outputs have short-circuit protection, helping prevent blown transistors and selectable automatic or manual dimming. Meets MUTCD.

D - Compact Radar-Speed Trailer

The Wanaco radar-speed trailer with full-matrix display features the largest portable speed sign available today. Visible over a standard Jersey barrier traffic divider, the giant display shows motorists' speed in 26-inch characters, warning motorists to slow down by flashing their excessive speed.

- Extra-large full-matrix display
- Optical lenses and sun shades over 26-inch LED characters
- Selectable speed-limit setting
- Clearly displays speed in mph (one or two digits)
- Software-controlled selection of speed units, mph or km/h
- 24x30-inch regulatory speed-limit sign included, other sizes available
- Regulatory sign has changeable speed-limit numbers
- Compact and easily portable, 5-minute setup
- Under 900 pounds (400kg), can be towed by most vehicles
- Standard 2-inch ball coupler tow-hitch
- Battery powered & solar charging
- Locking control box and battery compartment

VEHICLE ATTENUATORS

**Scorpion®
TMA**
Truck Mounted
Attenuator

A - Scorpion® TMA Truck Mounted Attenuator

The Scorpion line of Impact Attenuators, by TrafFix Devices, Inc., are truly "different by design".

The Scorpion TMA consists of strut and cartridge sections that are linked together on a support frame. The curved side rails are made from corrosion resistant aluminum tubes, which offer full width impact protection along the entire length of the unit. The side rails were designed to re-direct errant vehicles away from the rear of the truck (coffin corner). Other manufacturers Crash Attenuator models have little or no side-angle impact protection.

The aluminum boxes are filled with a moisture proof, aluminum honeycomb material. The boxes, together with the curved side rails, absorb the energy from an impacting vehicle. The aluminum boxes are painted with a bright yellow powder-coated finish, for lasting durability.

The TrafFix Devices' Scorpion TMA has been tested and has PASSED ALL optional and mandatory requirements suggested in the NCHRP-350 Report for TL-3. Additionally, the Scorpion TMA has passed the UKTD49, 110 km/h (68 mph) test. The Scorpion TMA has successfully passed a "worse case" side angle re-directive impact test - this goes beyond all governmental testing requirements. Full details available upon request.

Scorpion Model C TL-3

The Scorpion TMA Model C folds up and over the bed of flat bed, stake bed, or dump trucks. The Model C with its compact design and balanced weight distribution makes it ideal for high-speed travel. The Scorpion TMA Model C provides TL-3 impact protection. Side mounts are also available.

- Weight: 1,975 lbs (900 kg)
- Length: Travel/Storage 2' 5" (.74 m), Deployed 13' 10" (4.21 m)
- Width: 8' (2.45 m)
- Height: Travel/Storage 10' 6" (3.05 m), Deployed 1' (.3 m)
- Tests Passed: 3-50, 3-51, 3-52, 3-53

A T07485	10929Quick Release Kit

**Scorpion®
TA**
Trailer
Attenuator

B - Scorpion® Trailer Attenuator

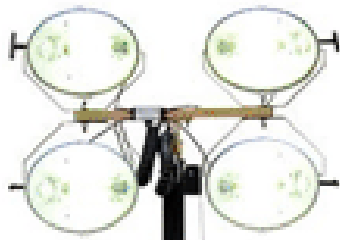

The Scorpion Trailer Attenuator, with its unique curved design, gives full width protection to the back of the host vehicle and protects the "coffin corners" of the truck and is NCHRP 350 tested and approved for all mandatory and optional offset and angled impacts. The Scorpion Trailer requires little or no modification to host vehicle or additional mounting hardware beyond the standard pintle hook and 1/2" thick x 32" wide steel frame plate. This single point attachment makes the installation of the Scorpion TA quick and easy.

The Scorpion's proven modular design crushes in progressive states allowing quick and economical replacement of damaged parts. Rear axle placement improves trailer stability and prevents the tail from "bottoming out" on driveways or uneven surfaces. The overall length of the Scorpion TA is only 17' 10", the shortest on the market, and is available in shorter (13') lower speed TL-2 (45 mph) model, which is ideal for congested city streets or where posted speeds are 45 mph or less. The integrated electric brake system comes standard on all Scorpion Trailer Attenuators and are automatically activated in the event of trailer separation or hitch failure. Optional Arrow or Message Boards can easily be attached to the Scorpion Trailer.

- Weight: 1,730lbs (785kg)
- Length: 17' 10" (5.44m)
- Width: 96" (2.44m)
- Height: 36" (0.91m)

RENTALS AVAILABLE

A - Portable Diesel Light Towers

Not just another light tower, Wanaco light towers use state-of-the-art technology to achieve superior illumination exceeding government regulations for worksite illumination. With four 1000-watt light fixtures atop a 30-foot variable-height mast, Wanaco light towers shine a uniform light pattern across the entire job site.

- High-efficiency light fixtures provide uniform light pattern
- Durable fixtures resist shock and last longer
- Unique lamp design increases filament life and keeps maximum light on the job longer, increasing productivity while saving time and money
- Rotating tower allows 360-degree rotation, reducing the need to frequently move the light tower trailer
- Compact design with removable tow bar allows efficient transport and storage
- Lockable, weather-resistant, steel cabinet protects components from the elements
- Trailer mounted, combo hitch with 2" ball/3" pintle hook, winch & cable lifting mechanism
- Two outriggers and four leveling jacks provide stability
- Control panel features elapsed hour meter, 120-volt GFCI receptacle for powering external equipment, and circuit breakers for on/off functionality and protection
- Tier 4 diesel engine includes glow-plug preheat system for improved cold-weather starting
- Automatic engine shutdown system protects engine from damage due to low oil pressure and high coolant temperature
- Exclusive hinged top panel provides unimpeded access to engine, generator and electrical components
- Fuel capacity of 30 gallons provides extended run times of 60 to 70 hours between refueling, depending on environmental influences
- Translucent polyethylene fuel tank provides instant view of fuel level, eliminating the need for a fuel gauge

KEY SKU	MFG#	DESCRIPTION

B - Solar Powered Light Tower

In applications where noise is an issue, silent power is the only option. Wanaco portable solar towers provide light without noise, and without an external power supply. The energy-efficient LEDs on these light towers are powered by batteries, which are charged automatically via adjustable solar panels.

- (4) Adjustable High-Efficiency 52W Watt LED Fixtures
- 4600 Lumens per Fixture (total 18,400 lumens)
- (4) 4D AMG Batteries
- Adjustable 750 Watt Solar Panel
- 40A Charger, Trailer Mounted
- Combo Hitch with 2" Ball
- Winch & Cable Lifting Mechanism
- Black and White Powder Coat Finish
- 20' Maximum Height, Security Battery Box

KEY SKU	MFG#	DESCRIPTION
B..... E60159...	WLTS-MMA4500W Solar Powered Light Tower
B..... E60160...	WLTS-LMA4750W Solar Powered Light Tower

C - Balloon Light Cart

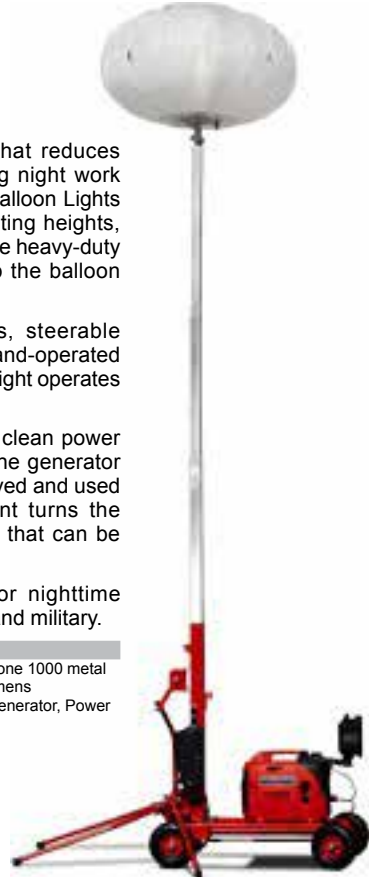

Balloon lights provide diffused light that reduces shadows and eliminates glare, making night work safer and easier on the eyes. Wanaco Balloon Lights light up large areas even at low operating heights, and with integral outriggers deployed, the heavy-duty steel base and telescoping mast keep the balloon light stable in gale-force winds.

Set-up is easy with pneumatic tires, steerable wheels, fold-down outriggers, and a hand-operated winch for raising the tower. The balloon light operates at any height.

A portable inverter generator provides clean power that is safe for sensitive electronics. The generator is attached to the cart and can be removed and used independently. A floodlight attachment turns the generator into a powerful light source that can be moved by hand.

Wanaco Balloon Lights are perfect for nighttime operations by fire rescue, EMS, police and military.

KEY SKU	MFG#	DESCRIPTION

TEMPORARY CRASH CUSHIONS

RENTALS AVAILABLE

BIG SANDY®

A-F - Big Sandy® Sand Barrels

The Traffix Devices "Big Sandy" is an Impact Attenuator Sand Barrel that is easy to move and provides external verification of the barrels correct weight of sand. This Impact Attenuator/Crash Cushion Sand Barrel has been tested and certified to meet the crash worthy requirements of NCHRP 350. "Big Sandy" Sand Barrels go above and beyond these requirement to provide the best in highway safety.

Features:

- Different barrel configurations are used to create all of the weights used in current standard array geometries (200, 400, 700, 1400, and 2100 lbs)
- External sand weight verification is easy - use the right barrel configuration barrel to obtain the correct weight
- Each "Big Sandy" Barrel is a made from a single piece of Polyethylene Plastic to eliminate sand leakages - No Edge Seals
- No cone inserts for easy shipping, storing, and installation

** NCHRP 350 Tested 12 Barrel Array

Key: Numbers indicate weights in hundreds of pounds required for each sand barrel in the array

- 21 2100 lb. = 953 kg.
- 14 1400 lb. = 635 kg.
- 7 700 lb. = 315 kg.
- 4 400 lb. = 181 kg.
- 2 200 lb. = 91 kg.

This drawing is an example of a typical array plan and should in no way override what is specified by your Local or State Traffic Engineer. Contact your Local or State Traffic Engineer for specific site recommendations for each situation and location.

G - Absorb 350™ Crash Cushion

The ABSORB 350™ Crash Cushion system has been fully designed and tested to comply with the evaluation requirements of the National Cooperative Highway Research Program Report 350 (NCHRP 350) for Test Levels 2 (70 km/h) and 3 (100 km/h). The Test Level 2 system contains five (5) Energy Absorbing Elements (EAB) and the Test Level 3 system contains nine (9) Energy Absorbing Elements.

It is sometimes desirable to have a crash cushion that has an energy absorbing capacity that is less than Test Level 2, between test Level 2 and Test Level 3, or greater than Test Level 3. Therefore, the following table indicates the number of elements and the element placement configuration that would be required to absorb the kinetic energy of a 2000 kg (4400 lb.) vehicle impacting the front of the ABSORB 350 system, head-on and at the velocity indicated.

MPH | KPH

TEMPORARY WORK ZONE BARRIERS

A - Traffix Water-Wall™

- Durable polyethylene plastic minimizes cracking and breaking.
- Molded through holes eliminate bowing when filled with water.
- Double wall knuckle design minimizes breakage at hinge points.
- Hinge design allows for a 30-degree pivot between sections.
- Large 8" fill hole speeds filling process, includes twist-lock plastic cap.
- New tamper resistant, corner offset drain plug with coarse buttress thread - screws in or out in only 2 1/2 turns.
- Includes one steel connection pin that allows sections to be locked together.
- Forklift/Pallet Jack slots at bottom allow for easy movement and transport.
- Standard colors are orange/red or white - additional colors available upon request.
- Will accept plastic or chain-link fence (with extended connection pins).

B - K-Rail Temporary Concrete Barrier

For vehicle control and construction site safety. Reduces crossover accidents, liability exposure, vehicle damage and traffic fatalities.

Common non-highway uses for k-rail barriers:

- Security perimeters
- Protecting fences
- Site access blockage
- Earth retention
- Barricading open pits
- Defining roadways/walkways
- Containment of rock, sand and recyclables in storage areas

KEY	SKU	MFG#	DESCRIPTION

G - Line-PRO™ 1112 K-Rail Paint

Line-Pro 1112 is a high hiding white waterborne paint that is specially formulated for use on concrete K-Rails. While separating lanes of traffic, preventing head-on collisions, or protecting Work-Zone personnel, K-Rails tend to accumulate auto contact and tire marks. Line-PRO 1112's high hiding formula is designed to refresh the look of the K-Rail so that they remain a bright white during the day with a bright appearance at night.

KEY	SKU	MFG#	DESCRIPTION
G	M06334	1112	Line-PRO™ 1112 K-Rail Paint, white, 5 gallon

H - PCBM-12 Barrier Mount Reflector

For work zone traffic control or permanent delineation. It has over 12 square inches of reflective sheeting and the versatility of either top or side mount placement. The added brightness gives motorists additional response time when driving through hazardous areas day and night.

B - Revolution Series Traffic Cones

The Revolution series is quality manufactured using premium grade PVC Injection molding technology, resulting in the most durable traffic cones available in the U.S. market. Our patented process gives you the best of both worlds—high quality products, at a very attractive price.

Reflective RS Traffic Cones features 3M 3840 hi-intensity reflective cone collars, complementing the high quality of the Revolution series. By pre-applying 3M 3840 collars on all JBC night cones, we have created a cone with outstanding durability and superior night-time safety.

C - Colored Safety Cones

All vinyl construction assures durability and flexibility in all weather conditions. Long lasting brilliant fluorescent color provides high visibility protection. Ultraviolet stabilized color provides maximum resistance to fading. High density base creates low center of gravity for maximum stability. Engineered to meet MUTCD specifications.

D - Retractable Cone-Bar

Designed to work with traffic cones or Knob-Top delineators. The Cone-Bar is extremely versatile for road trench or utility works use, construction sites, parking lots, pedestrian areas, and more. Compared to warning tape, the Cone-Bar is highly effective in terms of both cost and functionality. The Cone-Bar is reusable, highly reflective at night, and it creates true work-site traffic control.

PORTABLE DELINEATORS, CHANNELIZER DRUMS

A, B, C - JBC N-Top & D-Top Delineator Post

Use these posts for temporary placement where space is limited and height is important. Low-density polyethylene construction maintains superior resistance to impact over a wide temperature range. A specially designed 4" channel protects the 3" high-intensity reflective tape. Posts are bright red-orange throughout for maximum visibility. Bases slip over the post to keep it in place.

N-Top Delineator Post has a 3" hand grip on top for ease of loading and unloading. It is also designed to be used with caution tape and/or JBC Cone Bars to form an instant barrier.

The D-Top fits even the largest hands. Hole at top to mount a barricade light and when used in conjunction with the JBC cone bar, you can create a barrier in seconds!

KEY SKU	MFG#	DESCRIPTION

D - GrabberTube® II Delineator

The stem of the Grabber-Tube II is made of flexible yet durable fluorescent low density polyethylene material, with UV inhibitors to minimize fading. The NEW Grabber Handle fits your hand better and makes movement and placement a breeze and the NEW Grabber Hole in the stem provides convenient carrying handle for movement and deployment, even off the bed of a work truck. The recessed areas on the stem protect the reflective bands, minimizing rips and scratches. Bases are made from 100% Recycled Rubber. All Recycled Rubber Bases are designed with easy grip handles, and stacking rings for easy storage and transportation. Meets Federal MUTCD standards.

E - Looper-Tube® Delineator

The unique "loop" style handle makes grabbing and moving the Looper-Tube a breeze! Even on and off the bed of a work truck! Closing off an area of the job site is quick and easy when utilizing the "loop" style handle with two (2) or more Looper-Tubes tied together with caution tape, flag line, or rope.

G - Grabber-Cone® Delineator

The stem of the TrafFix Grabber-Cone is made of flexible, yet durable, fluorescent low density polyethylene material, with UV inhibitors to minimize fading. The recessed areas on the stem protect the reflective bands, minimizing rips and scratches. The extra-large flange at the bottom of the stem allows the rubber base to hold it firmly in place. With its reinforced handle design, the Grabber-Cone can support the weight of stacked cones and bases without permanent distortion. Its low density polyethylene material and handle design prevents the cones from sticking together when stacked. The Grabber-Cone can be stacked with or without bases. Meets Federal MUTCD standards.

H - Looper-Cone®

The Looper-Cone, with its patented reinforced handle design, can be stacked without sticking together. The durable low density polyethylene plastic keeps the cones shape, reducing crushing and breaking. The Looper-Cone, with its reinforced handle design, can support the weight of stacked cones and bases without permanent distortion. The durable low density polyethylene material and handle design prevents the cones from sticking together when stacked. The Looper-Cone can be stack with or without bases.

J - TrafFix Channelizer Drum™ 18000 Series

Minimum of 18" wide throughout its 36" height, regardless of orientation. Tapered design allows stacking with or without barricade lights for easy handling and storage. Drum and base remain "snapped together" until impacted or separated for transportation and storage. Built-in carrying and dragging handle. Two mounting holes for optional barricade lights. UV inhibitors minimize fading. NTPEP tested-meets or exceeds MUTCD specifications. "D" shaped design minimizes rolling after impact and separation from base. 100% recycled rubber base for increased durability and "gription" which resists movement from passing vehicles.

K - TrafFix Tire Ring Base

Made from truck tire sidewall sections. It's economical and easy to use and provides all the ballast you'll need to hold a drum in place, even in the windiest conditions. The tire ring eliminates the need for sandbags that tear or break leaving messy sand on the roadway. The rubber tire ring "grips the road" and minimizes drum movement and rotation.

KEY SKU	MFG#	DESCRIPTION

The TrafFix Channelizer Drums are available in rugged, durable high density polyethylene; or impact resistant, reshapeable low density polyethylene.

TRAFFIC & PEDESTRIAN BARRICADES

A - TD2150 Works Econocade

- Innovative, blow-molded leg design provides increased strength and prevents sagging in extreme heat.
- Panels are recessed to protect the reflective sheeting.
- Completely stackable, allowing for a more efficient use of warehouse space.
- Designed to yield upon impact to minimize vehicle damage.
- Sign hole for 24" to 48" signs.
- Manufactured from specially formulated plastic compound, utilizing polymer protection and UV stabilizer.

B, C - TD2300 Works Barricade

- Wood panels with 14 gauge galvanized steel legs.
- (2) 6" X 24" bottom panels unsheeted (Type I) or sheeted (Type II).
- (2) 8" X 24" top panels sheeted with engineer grade (EG) reflective sheeting.

D - TD2500 Wood and Steel Type III Barricade

- Durable hot rolled carbon steel upright frame and base stand with 2" x 2" square tubing receiver.
- Designed to accommodate two warning lights.
- Distinctive base design allows for short term or permanent fastening.
- Frame and base are protected with powder coated enamel paint.

KEY SKU	MFG#	DESCRIPTION

E - 37000 Series High Impact Plastic Folding Barricade

- Made from durable impact resistant polyethylene
- Blow molded legs provide increased strength to minimize barricade damage and to prevent sagging in extreme heat
- Modular design allows for easy replacement of components
- Unique San-Fil bottom panel eliminates messy sand bags

F - Metro-A-Cade A-Frames & Rails

Traffix A-Frame is made of impact resistant polyethylene, rigid, A-Frame barricade leg is sand fillable for ballasting, stackable for storage and transportation, and can be used with the Traffix I-Beam Rail, Phoenix Plastic Rail, 1" x 8" or 2" x 8" nominal lumber. Accommodates standard or "D" cell barricade light. Metro-A-Cade is economical, accepts 1 or 2 Phoenix Plastic Rails, 1" x 8" or 2" x 8" nominal lumber.

KEY SKU	MFG#	DESCRIPTION

G, H - 35000 Series High Impact Metal Leg Barricade

The 35000 Series barricades, feature metal legs with High Impact (blow molded) panels. Now you can combine the strength of impact resistant plastic panels with traditional metal legs. These barricade components come together to form a more durable folding barricade. Durable impact resistant plastic panels are recessed to protect reflective sheeting. NCHRP 350 accepted with standard or "D" cell barricade lights. Meets MUTCD standards.

I, J - SafetyRail™ ADA-Compliant Pedestrian Barricade

SafetyRail™ meets ADA Guidelines and MUTCD 2009 Edition Standards both as a sidewalk closure or longitudinal channelizer. Designed for use with the PSS Wave Guide Rail, SafetyRail™ provides pedestrians, especially those with limited vision or mobility issues, with a safe, continuous guide through pedestrian work zones.

- Smooth, continuous upper surface for safer hand-trailing.
- Long cane users can tap confidently. Space between bottom and ground is less than 2"; reduces potential for trapped cane tips.
- Accepts pedestrian aids like warning lights and Audible Information Devices.
- Retroreflective sheeting helps guide pedestrians safely through work zones.
- Flat vertical surface (the front, as shown) eliminates obstacles, like those found in most barricades.
- Interlocking - No tools required.
- HDPE plastic w/ UV inhibitors.

KEY SKU	MFG#	DESCRIPTION
I.....	T03141...SR38-B4SafetyRail ADA-Compliant Pedestrian Barricade Upright
J.....	T03141...BP-04M336R-NWave Panel, Notched for SafetyRail, 4' Long, sheeted one side, Right Direction, Hi-Intensity Grade

K - Low-Profile Airport Barricade

Made in the USA / Recycled Product. Our inter-locking pin allows these airport barricades to form a continuous wall in almost any configuration. This airport barricade has passed Jet-Blast testing requirements at 35mph and 70mph. 10"H x 96"L x 10"W, 19 lbs. empty, 270 lbs. full, .20" thick high density polyethylene wall, 84" interconnected length.

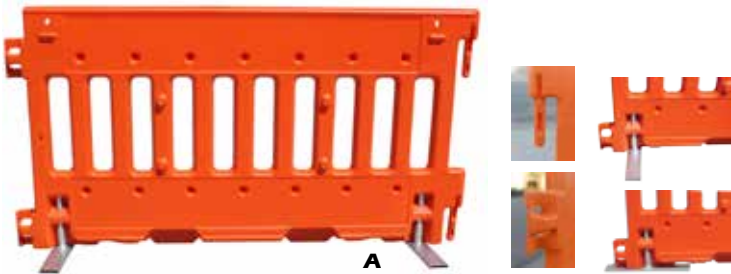

KEY SKU	MFG#	DESCRIPTION
K.....	T03131...AR10X96Low-Profile Airport Barricade

L - Pre-Striped Barricade (PSB) Sheeting

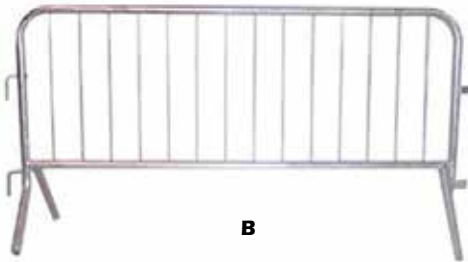

Pre-Striped Barricade (PSB) Sheeting is scratch resistant and has alternating 4" stripes running diagonally at an angle of 45°. Coated with an aggressive, high-tack pressure sensitive adhesive that will bond well to most substrates used in the construction zone signing.

KEY SKU	MFG#	DESCRIPTION
L.....	T05050...CN8117 L4PSB Sheeting, 4" left stripes, orange/white, engineer grade, 8" x 50yd roll
L.....	T05052...CN8117 R4PSB Sheeting, 4" right stripes, orange/white, engineer grade, 8" x 50yd roll

PEDESTRIAN BARRICADES, TEMPORARY SIGNS

The Urbanite being used at the 2015 Honolulu City Lights Holiday Parade!

B

**RENTALS
AVAILABLE**

A - Urbanite® Crowd Control Barrier

The TrafFix Urbanite creates a continuous hand guided safe passage through work zones. The TrafFix Urbanite is made of UV stabilized, high density polyethylene. The linkable Urbanites quickly and easily link together in 6 foot sections to allow the contractor flexibility in creating a safe pedestrian pathway.

Weighing only 23 lbs., the durable double walled, non-flexible, lightweight design makes the Urbanite easy to lift on and off the truck and easy to connect. The ten molded-in vertical windows reduce wind load, add strength and stability, and reduce overall weight of the Urbanite. They also allow a guide dog to see what is on the other side of the wall.

Features:

- Ergonomic handrail provides a comfortable and secure guide through the work zone
- Locations for two (2) Barricade Lights
- Protect pedestrians from workzone hazards
- Four (4) molded-in Stacking lugs for secure transport and storage.
- Two standard colors available: Orange and White
- Custom colors available upon request
- Optional Leg set for ADA compliant applications
- UV inhibitors to minimize fading
- Made of flexible low density polyethylene
- Stackable for easy storage and transportation
- Available with various size and types of reflective sheeting
- Parades/crowd control
- Pedestrian traffic control
- Barricade construction work zones
- Blow Molded connectors provide strength and flexibility

SynchroGUIDE™
Sequential Channelizing Device

A - Cortina Barricade Lights

Meets all MUTCD and ITE specifications in 12 volt configuration. Reliable chip circuit is weather resistant. 7" polycarbonate lens provide extreme durability. Attaches to all barricades. State of the art optics. UV stabilized polycarbonate.

KEY SKU	MFG#	DESCRIPTION
A.....	T04096...	03-10-3WRY6V ..Barricade Light, 6-volt w/ photocell, 3-way switch, red lens

B, C - Model 2006 & 2006 Plus (Solar Assist) Barricade Light

Features completely redesigned rugged and durable co-polymer case with breakaway internal candle. Servicing is made easy with a snap-lock case and vertically positioned batteries. The impact absorbing breakaway candle reduces internal damage. Bright and dependable LED's coupled with power efficient, reliable moisture proof circuitry, provide trouble-free operation. Candles from 2006 and 2006 Plus solar assist are interchangeable. Solar panels on the 2006 Plus are internal providing less chance for damage and theft.

KEY SKU	MFG#	DESCRIPTION

C.....	T04087...	2006 PLUSModel 2006 Plus Solar Assist Barricade Light,

D - B4DH High Intensity Type B Barricade Light

- Exceeds I.T.E. and MUTCD standards.
- Independent laboratory tested to I.T.E. Type B requirements.
- Visor eliminates sun glare.
- Light dims 50% at night - extends battery life.
- Operates on two or four alkaline "D" cell batteries (not incl.).
- Lenses molded from UV stabilized polycarbonate.
- Case is high impact polypropylene.

E - WSCD SynchroGUIDE™ 6 Volt Sequential Barricade Light

- Sequential devices now referenced in the new 2009 MUTCD - Sect. 6F.63.
- Separates motorist from work areas and drop-offs.
- Sequential channelizing devices provide for smooth and gradual traffic movement from one lane to another.
- Steady-burns in low intensity mode and pulses momentarily to higher intensity keeping motorists in their proper path and protecting workers.
- Wireless signal transmission.
- Carrying handle on each light comes standard.

48" Reflective Roll Up Ramp Closure Kit

RAMP CLOSED Kit, Day/Month/Time. Complete kit includes (62) overlays with velcro, overlay storage bag and cross brace with clamp. Made of 3M reflective material, meets MUTCD requirements, NCHRP-350 compliant, graffiti remover resistant, reinforced sewn corner pockets, velcro closure strap.

KEY	SKU	SIGN#	DESCRIPTION
.....	RS2078	SC6-3(CA)48" Reflective Roll Up Ramp Closure Kit

Vinyl Roll Up Signs

Roll up signage offers increased visibility, easy to transport and store. MUTCD standards require the use of 48" advance warning signs on any roadway with traffic speeds at or in excess of 45 MPH, and reflective signage for use during hours of darkness. JBC's roll up signs are made in the USA, have heavy duty reinforced sewn pockets and a legend that will withstand harsh chemicals such as graffiti remover and brake cleaner. Tack, grime and graffiti can be removed from JBC's roll up signs, without destroying the printed legend. The actual legend can be read whether the sign is folded or rolled up.

Reflective roll up signs are made with 3M reflective vinyl material. Non-reflective roll up signs are made with non-reflective mesh vinyl material. Both styles meet MUTCD requirements and is NCHRP-350 compliant. Features graffiti remover resistant, reinforced sewn corner pockets and velcro closure strap.

A - Traffix Little Buster® Sign Stand

Designed to hold 30", 36" and 48" aluminum, wood, plastic or roll-up signs. With its all steel construction and powder coated paint, the Little Buster from Traffix Devices easily resists corrosion and rusting. The telescoping mast, with adjustable rigid or roll-up sign brackets, allow for variable sign height adjustments on the fly. The dual spring mounted base adds stability during high winds and passing traffic.

The Step-N-Drop legs enable you to set-up the Little Buster sign stand in seconds without having to bend over or stoop down. With its two-position leg adjustment, all four legs of the Little Buster all can be individually adjusted for uneven terrain.

B - Traffix Econo Buster® Sign Stand

Weighing less than 30 lbs, the Traffix Devices Econo Buster is a lightweight yet durable stand for 36" x 36" and 48" x 48" roll-up or rigid signs. The telescoping inner mast allows all types and sizes of signs to be mounted at various heights. The powder coated paint on the steel legs and telescoping mast resists rusting.

The step-n-drop leg design enables you to set up quickly without having to bend down or stoop over (no pins to kick, push or pull). The three position locking leg design allows you to adjust for uneven terrain.

C - Traffix Tri-Buster® Sign Stand

Constructed of corrosion resistant heavy duty galvanized steel tubing for a long life at an economical cost. The three leg design of the Tri-Buster is very stable, in even the windiest of conditions. The ballasting hook allows sand bags or weights to be hung from sign stand for added stability. With safety in mind, the Tri-Buster has been engineered with guards to eliminate dangerous "pinch points" and protect fingers. A built-in 3-flag holder secures 2 or 3 standard 3/4" wood dowel flags above the sign.

NCHRP-350 compliant with 48" x 48" or smaller; plywood, aluminum, aluminum poly laminate, plastic, and roll-up sign materials.

D - Traffix Phoenix™ Sign Stand

Designed with a pre-drilled square upright to accommodate multiple hole patterns found in most size signs. The Phoenix offers simple and easy way to mount signs that are different sizes and shapes to a single sign stand with no fuss. You can raise and lower signs anywhere along the six-foot long upright for more flexibility. The recycled rubber base with steel plate firmly grips the road surface, while presenting a narrow profile. Two Phoenix Sign Stands can also be used to support barricade panels to create a Type III Barricade.

The Phoenix Sign Stand is NCHRP-350 certified, with a 48" x 48" .080 aluminum sign, as well as, other size signs and with optional barricade light and flags.

E - Traffix Barrier Buster Sign Stand

The Barrier Buster Concrete Barrier Clamp is designed with 3 holes that will accept Little Buster and Big Buster Springs and most other manufacturer's springs and components. The Barrier Busters T-pins are designed with hardened steel points for added stability and security when attaching the Barrier Buster to a concrete barrier wall. The Barrier Buster safely displays 48" x 48" or smaller rigid or roll-up signs.

F, G - Traffix Sign Stand 22000 Series

The Traffix Sign Stand is compact, easy to carry and stores in small areas. It's tip resistant design effectively spills wind and holds a 36" x 36" or 48" x 48" roll-up sign securely without heavy springs or a bulky mast. All parts of the Traffix Sign Stand can be easily replaced and a complete parts list is included with each stand.

A, B, C - FlaggerJoe™ - Safety Sign System

FlaggerJoe was created not only for Flaggers that stand on the side of the road in the hot blazing sun exposed to dangerous ultra violet rays; that work in climates where it may rain for hours at a time... but also to give your employees a safer Flagging Station with much greater visibility!

To help address these potential hazards associated with Flagging, we've designed a canopied Safety Sign System that encompasses not only a commercial grade umbrella, but also features a quick release swivel Stop/Slow sign. And while we understand the importance of protecting Flaggers from the elements, equally important is the greater safety awareness FlaggerJoe brings to the construction zone through the use of a highly visible custom orange canopy and double warning flags.

- Mash Crash Tested Approved by the FHWA WZ-325 Certificate
- Increased Work Zone Visibility
- UV Sun Protection, 100% Waterproof Canopy
- Reduces Heat Stress and Flagger Fatigue
- Storage Bag, Mobile and Easy to Assemble
- Converts When Wind is Present

KEY SKU	MFG#	DESCRIPTION

72" Adjustable Staff		
E..... T08060	18024-PH6B	72" Plastic Staff with non-skid rubber end cap for stop/slow paddles

F - Stop/Slow BlinkerPaddle® Flashing LED Paddles

Flashing LED paddles deliver a bright warning to help protect children, crossing guards, temporary traffic control personnel and road/emergency personnel. Eight bright LEDs on each face flash in unison, commanding the attention of oncoming motorists in all weather conditions. Thumb switch turns LEDs on for either (or both) signfaces. LEDs automatically shutoff when paddle lowered below horizontal. Light-weight design minimizes arm and wrist stress (18" paddle weighs less than 2 pounds). Includes: (1) BlinkerPaddle LED Paddle, (3) rechargeable NiMH batteries, (1) 120v AC wall charger

KEY SKU	MFG#	DESCRIPTION
F..... T25054	2180-00321	18" STOP/SLOW BlinkerPaddle, diamond grade sheeting
F..... T25056	2180-00350	24" STOP/SLOW BlinkerPaddle, diamond grade sheeting

G - EXTREME Standing Mat®

The ultimate shock absorber for extreme standing or kneeling. Keeps body in gentle motion to improve circulation and joint lubrication while eliminating high frequency vibrations. Designed for fixed workstations. Yellow safety caution bars alert 1" height. The 1" thick closed cell silicone free nitrile foam rubber will not absorb liquids.

KEY SKU	MFG#	DESCRIPTION
G..... G04022	.5020	28" X 16" EXTREME Standing Mat
G..... G04016	.5030	36" X 18" EXTREME Standing Mat

H - Personal Safety Baton

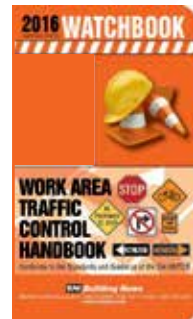

Steady burning of 120 Rapid-Fire flashes per minute - Bright Red flash over entire length of baton - All LED display, over 300 hours per set of "D" Batteries (not included) - Easy storage in truck or under seat - Lightweight and durable. 21.5" Long, 1.75" Diameter.

I - 2D Industrial Flashlight with Krypton Bulb & Magnet

Tough polypropylene body with barrier wall and bulb support system. Water, chemical, oil and gas resistant. Strong magnet attaches to furnace, fuse box, refrigerator, cabinets and more. 17 lumens. Uses (2) D-cell batteries.

KEY SKU	MFG#	DESCRIPTION
H..... E11433	PSBLED-R	Personal Safety Baton, Red

The ML Kishigo Difference

Premium
Brilliant Series®
Part #1510

Disclaimer: The ML Kishigo vest above is ANSI compliant for a minimum of 25 wash cycles, though utilizes high quality reflective materials compliant up to 50 wash cycles.

IS YOUR SAFETY PROGRAM HANGING BY A THREAD?

1 - STITCHING

ML KISHIGO: Triangle Security Stitch to reinforce corner pockets so seams don't tear even under the most punishing circumstances.

OTHERS: Single stitched pockets that tear frequently.

2 - FABRIC

ML KISHIGO: Athletic high-performance mesh material – similar to high performance Athletic Jersey's and shorts.

OTHERS: Textured mesh material that clings to the body.

3 - SIZING

ML KISHIGO: Reliable sizing with large generous armholes for a true-to-size fit.

OTHERS: Inconsistencies in manufacturing lead to improper fit and discomfort – oftentimes resulting in smaller armholes.

4 - HEM REINFORCEMENT

ML KISHIGO: Heavy duty webbing reinforcement around neck, front closure and bottom of vest to strengthen hem and prolong life of vest.

OTHERS: Single stitched bias provides the bare minimum amount of protection from wear and tear in the rugged environment.

5 - REFLECTIVE TAPE

ML KISHIGO: High performance reflective tape that can withstand 50 wash cycles and still maintain ANSI compliance.

OTHERS: Cheaper reflective tape that falls off and wears away easily.

A - Premium Brilliant Series® 6 Pocket Heavy Duty Vest

Ultra-Cool™ 100% polyester mesh material with 2" wide high performance reflective material and 3" breathable contrasting color. Brilliant Trim reflective edging to improve low light visibility and zipper front closure with durable webbing reinforcement. Left and right chest mic tabs. 6 Pockets: Two lower outside cargo pockets with grommets and adjustable flaps, right chest 2-tier pencil pocket, left chest radio pocket and two inside patch pockets. ANSI/ISEA 107 2010 Class 2 Compliant

B, C - Premium Brilliant Series® Heavy Duty Class 3 Vest

The Class 3 version of our top of the line ultimate visibility vests. If you are serious about visibility both day and night and finished quality, look no further.

Ultra-Cool™ 100% polyester mesh with Brilliant Trim reflective edging to improve low light visibility. Zipper front closure with durable webbing reinforcement. 2" wide silver reflective material with 3" breathable contrasting color and left and right chest mic tabs. Two lower outside cargo pockets with grommets and adjustable flaps, right chest 2-tier pencil pocket, left chest multi-use cell phone pocket with flap and two inside patch pockets. ANSI/ ISEA 107 2010 Class 3 Compliant.

A - Corner Light LED

22 flash patterns, wide angle optics. For mounting inside turn signal housings or for external mount with flange. 1" diameter hole, 1" minimum depth required for internal installation. Solid state circuitry, potted in housing, includes external mount flange. 12/24V.

B - LED Grill Lighting

HIGH Output LEDs - great for hide-away applications. Features two 6 LED Lamps with 10' of cable between the two heads. Optional Mounting Clips provided for versatile installation.

C - High Power LED Grill Lights

HIGH output LEDs with superior lensing for direct and wide-angle viewing. Highly conspicuous, attention-getting flash pattern. Features two 9 LED lamps with 10' of cable between the two heads. Optional "L" brackets included.

D - LED625 & TF625 Series High Power Warning Lights

LED625F-A is a high impact LED Warning light with a complete 360 degree display. Flash pattern can be changed with button on base of light. There are five (5) user-selectable patterns. TF625 comes with a standard tri-flash bulb.

E - SAE CLASS 1 Quad-Flash Microburst LED Warning Light

The LEDQ375MX-A is designed for vehicle applications where a small very bright light is required. It features a conspicuous quad-flash pattern for a more attention-getting warning light.

F - Economy Low-Profile LED Mini-Bar

12/24V Economy low-profile LED light bar. Cycles thru 3 pre-programmed flash patterns. 17.25" L x 2.75" H x 9.4" D.

G - Rotating Light Micro Mini-Bar

The MMB Rotating Light Micro Mini-bars are 17.25" in width and include a polycarbonate outer dome and a powder painted steel base with rubber gasket. The MMBTR-X rotating light mini-bars feature two 55 watt XENON bulbs (2000 Hours) in a highly polished reflector for a very efficient and attention getting warning light.

H - Revolving Lights - TR Series

The TR Series is a low-cost revolving light which combines a bright halogen lamp with a polished reflector. 65000 candelas/second. 12V Halogen.

I - Square LED 1200 Lumen Economy Work Light

12/24V Square LED Economy Work Light. 1.2 amp draw @ 12.8V - Includes 5 High-Powered LEDs. Sealed, water tight lens assembly, IP:68. Single bolt mount, full tilt, 360 degree. Diecast aluminum housing. Two surface mount brackets included w/hardware packet.

VEHICLE WARNING LIGHTS, LED FLARES

A - LED Mini Lightbar Warning Light

12/24 Volt DC, (4) 4-LED Lighthead, Meets California Title 13 and SAE J845, Magnetic/Permanent Mounts, Amber LEDs/Clear Lens, 11" L X 2.4" H X 7.3" D.

B - Blaze® II Low Profile Minibar

Features ECCO's smooth, low noise, belt-driven rotator mechanism that incorporates a free-form reflector to maximize beam pattern and light output. Flash Rate is 480 FPM. Meets J845 Class I, CE, IP54.

C - Pulse II® LED Beacon

7965 Series Pulse II® LED beacons offer SAE Class I light output and Pulse8 flash (8 flash per cycle) operation combined with a long maintenance free service life and low amp draw. Meets SAE J845 Class I, CE, R10.

D - 5800 Series Beacon

Features a smooth and quiet belt-driven rotator mechanism and incorporates a free-form optical reflector to maximize beam pattern and light output. Features a polycarbonate lens and twist-on lens with locking screw for easy bulb replacement. Flash rate is 195 RPM. Meets SAE J845 Class I, R10, R65.

E - 3700 Series Surface Mount

Features 4 LEDs and offers a total of 21 flash patterns, synchronization capability and SAE Class I operation. Its compact size and ability to fit confined mounting locations, zero maintenance and 5 year warranty are just some of its many benefits. Meets SAE J595 Class I, R10.

F - Single Head Flashing LED X Exterior Light

12/24, Directional Optics: 40° Spread 20° to the right and to the left of center, Wide Optics: 90° Spread 45° to the right and to the left of center, 5" L x 2" H x 1" D.

G - ED3702 Directional LEDs

These directional LEDs are bright and versatile warning lights that are suited to a wide variety of applications. Their ultra-low profile makes them easy to install virtually anywhere on a vehicle. Has 12 flash patterns. Features a dual-color light featuring 12 LEDs (6 amber and 6 clear). SAE Class I, CA Title 13, R10, R65.

H - LED Flood Beam Worklamp

1350 Lumen LED Worklamp featuring 9 LED flood beam, aluminum heatsink housing, acrylic lens. This LED model offers over 80,000 hours of maintenance free life expectancy coupled with extremely low amp draw. Meets CE.

I - LED Rechargeable Flood Beam Worklamp

650 Lumen LED Magnetic worklamp with lithium rechargeable battery allows the worklamp to be operated for 3-4 hours before recharging is required. Dual color, features five operating modes (100% intensity white, 30% intensity white, 100% intensity amber, double flash amber and quad flash amber). Supplied with a cigarette socket charging lead and North American AC charger.

K - Classic Road Flare w/ Red LEDs

The battery operated LED road flare is an extremely durable, 18-LED flare that is a safe alternative to incendiary flares. Crushproof, waterproof and will float. 7 Flash patterns and visible up to 1 mile. Magnet to attach to any magnetic surface. Requires 2 AA replaceable batteries (included).

L, M - Super Road Flares w/ Red LEDs

An advanced version of our standard LED flare. Rechargeable and is slightly larger for double the light output and two rows of red LED lights. Visible light range over 7 miles and effectively see the light patterns up to 2 miles. 7 flashing patterns including SOS Rescue (Morse Code).

N, O - Baton Traffic Flares

A multi-functional flare that can be a road flare or a safety wand. Strong enough to withstand heavy truck traffic yet light enough to hold easily in your hand to direct traffic. 15 red LEDs visible light range up to 4 miles (effectively see light patterns up to 1 mile). 1 Half-watt flashlight. Waterproof and will float. Crush and corrosion proof. High strength magnets attach to metal surfaces. Rechargeable battery, 120V wall charger, 12V car charger and USB charger included. 5 Flash patterns including S.O.S. Morse Code.

VEHICLE WARNINGS & SPILL CONTROL

F, G - Vehicle Warning Signs

KEY SKU	MFG#	DESCRIPTION
F.....S07152	...875560" X 12" OVERSIZE LOAD Banner, Heavy duty vinyl with grommets. Black on non-reflective yellow.
F.....S07154	...870296" X 18" OVERSIZE LOAD Banner, heavy duty vinyl with grommets. Black on non-reflective yellow.
G.....S07150	...M10-1105-2A14" x 16" Slow Moving Vehicle Sign, reflective, metal backed with mounting holes, certified to meet ASABE S276.6 standard.

A - Triangle Reflector Warning Kit

Meets DOT requirements of FMVSS125. Acrylic plastic strip reflectors unfolds to triangular shape. Wire bracing controls degree of tilt. Weighted blow molded storage tube serves as base. 3 triangles come in high impact plastic box. Wire bracing ensures compliance of 40mph wind test

KEY SKU	MFG#	DESCRIPTION
A.....T09057	...95-02-002-03Triangle Reflector Flare Kit, 3 triangles

B - Emergency Roadside Flares

Waxed, plastic cap, self-consuming, no spike. DOT Class X Fusee, 4.1, NA1325, PGII. 17.5 X 7.38 X 7.25. Ex Number: EX9209001. Non Perchlorate Formula.

KEY SKU	MFG#	DESCRIPTION
B.....T09060	...0720-0220 Minute Emergency Flare, spikeless waxed flare, plastic cap, sold individually
B.....T09031	...0730-0230 Minute Emergency Flare, spikeless waxed flare, plastic cap, sold individually

C - 3M™ Diamond Grade™ Conspicuity Tape

3M™ Diamond Grade™ Conspicuity Tape Roll of alternating 6 inch red and 6 inch white, highly reflective, microprismatic sheeting with pressure sensitive adhesive for easy application to trucks, trailers and large vehicles to enhance visibility and detection distance. 3M's DOT tape is highly durable with non-metallic construction and pre-sealed edges to prevent corrosion. Exceeds All US DOT and NHTSA requirements for truck/trailer.

KEY SKU	MFG#	DESCRIPTION
C.....W05048	...983-326-23M™ Diamond Grade™ Conspicuity Tape, 2" x 150'

D, E - Warning Flags

KEY SKU	MFG#	DESCRIPTION
D.....W08238	...SFKVH1818" x 18" Heavy duty knitted vinyl mesh tailgate flag with wire spreader.
E.....W08105	...APF36" X 36" Nylon Airport Flag, orange/white checkered, hem for staff (not included), meets requirements for airport construction jobs.

H- Oil-Only Responder™ Pads

Our MeltBlown Pads and Rolls are a must-have for any on-the-water oil spills. Starts wicking on contact to save time in critical situations. Works equally well on land or water — it even floats when fully saturated.

- Best performing pad on water due to fast-wicking fibers
- Highly absorbent MeltBlown polypropylene mat repels water and soaks up only oil and oil-based fluids
- Floats even when completely saturated — most effective for marine spills
- Bright white color makes it easy to locate in spill emergencies
- Won't fall apart even when fully saturated

I - Oil-Only Booms

Poly Blend Filler/Polyester Netting/Metal Hardware. Strong mesh outer sleeve encases a poly sock skin filled with highly-sorbent poly blend. Booms won't shed or sink, even when saturated with oil. Absorbs Oily Liquids — Repels Water. Poly blend filler is hydrophobic — it repels water (and floats) while only absorbing oils and other hydrocarbons. can be incinerated after use to reduce waste.

Oil-Only Responder™ Pads								
Key	Weight	Size	Package	Absorbency/Package	Color	#/Pallet	Item #	Product #
H	Medium	15" W x 19" L	100 pads	Up to 26.7 gallons	White	36	WP100M	O01158
I	Booms	5" D x 10' L	4 booms	Up to 30 gallons	White	20	WB510SN	O01169

J - Universal Over-Pack Spill Kit

Pre-packed in an X-rated DOT-approved OverPack. Twist-on, double-wall lid with closed-cell gasket provides sealed and secure closure to protect sorbents from moisture, dirt and damage. Rust- and corrosion-free 100% polyethylene is durable to withstand rough handling. Easy-to-move Kit can be transported via standard material handling equipment.

K, L, M - Universal Vehicle and Fleet Spill Kits

The Sorbents You Need Are All Inside - Includes a variety of sorbents to handle smaller spills of oils, coolants, solvents or water that truckers encounter on a regular basis; pre-packed in a handy bag. Self-contained, compact Kit stores sorbent products for easy access as needed for spill control; saves time when quick response is necessary. Small size; easily fits behind the seat of a truck.

LAND IMPROVEMENT SYSTEMS

A

B

C

ULTRATECH
INTERNATIONAL, INC

E

G

F

A - SiltSoxx™ Sediment Control

Uses composted green residuals inside a patented mesh containment system to remove sediment and pollutants through filtration and deposition. SiltSoxx™ can also be used to slow runoff flow velocities on sloped surfaces, thereby reducing the transport of sediment and soluble pollutants.

B, C - Straw Wattles

Wattles may be placed across channel bottoms, but their primary use is on hill slopes to break up slope lengths and slow overland flow. Straw Wattles can also be used as a replacement for silt fence.

D - Silt Fence

Used as a temporary sediment control device on construction sites to protect water quality in nearby streams, rivers, lakes and seas from sediment (loose soil) in stormwater runoff.

E - Ultra-Drain Guard®

Engineered to filter stormwater waste before it becomes a problem in the water system. As a storm drain filter, it removes contaminants like litter, sand, and oil from stormwater flow. It's geotextile fabric and easy installation makes it ideal for industrial facilities, construction sites, and parking lots where stormwater runoff is likely to carry oil, eroded soil, debris, and fuel contaminants from cars.

F - Gravel Bags & Sand Bags

Heavy-duty bags provide quick and easy sediment and erosion control.

G - Orange Safety Fencing

Orange Safety Fencing, 4' x 100'. X05645-002 Oval-Series Fence is used to create temporary and permanent visible barriers for a variety building and construction applications. Approximate opening is 1.8" x 1.8". Roll weighs 10 pounds.

H, I - MP Series Measuring Wheels

These Metal Professional (MP) wheels are durable enough to stand up to the harshest field conditions. All feature the industry's best counters with the best counter protection.

J - Top Reading Measuring Wheel

These innovative wheels feature a gear shaft driven counter placed above the wheel. This results in better balanced wheels.

K, L - RoadRunner Indoor/Short Run Measuring Wheel

Smaller 1-foot wheels combine Keson quality and reliability with convenient size and light weight. Typically used in short run and indoor applications these products are compact and very reliable. It's easy to measure curved, horizontal and asymmetrical surfaces.
